ACKNOWLEDGEMENTS

I thank God for giving me patience, courage and strength to do my work and to achieve whatever I wished out of life.

I wish to express my immense gratitude to my supervisor Dr. J. K. Batra, for his guidance, supervision and invaluable advice from the very early stage of this research as well as giving me extraordinary experiences throughout the work. Above all I thank him for always providing me unflinching encouragement and support. His true scientific intuition has made him as a constant oasis of ideas and passions in science, which exceptionally inspired and enriched my growth as a student and a researcher. I shall forever remain indebted to him for his unlimited help and attentiveness. He has been my mentor and to work under his supervision has been a rare and welcome opportunity that I will cherish forever. Without his able guidance it would have been impossible to complete this formidable task. I would like to thank him for sparing his valuable time and sharing his vast experience in formulating this work, which made him a backbone of this research and so to this thesis.

I thank Dr. A. Surofia, Director, NII and Dr. S. K. Basu, ex-Director and Professor Emeritus, NII for giving me an opportunity and support to work at such a prestigious leading research facility.

I would like to thank my Doctoral Committee members, Dr. D. Salunke, Dr. A. K. Sau, Dr. P. Sharma and Prof. S. S. Chauhan (AIIMS) for giving their critical and constructive comments and valuable suggestions during the course of my research work. I have also benefited by advice and guidance from Dr. A. K. Sau, who always kindly grants me his time for answering my questions during my hours of dilemma.

I can not find words that can equal the enormous feeling of gratitude that I feel towards my seniors, Paroma, Punya, Deepa and Dr Rakesh. From day one they have always been friends first and then seniors. My seniors have taken great pains to teach me bench work at which I had no prior experience. Without their guiding hand, it would not have been possible for me to accomplish anything.

I would like to thank my labmates, Anup, Divya, Santosh, Tabish, Narayani, Tariq and Parth. I would like to specially thank Anu and Kedar, my friends, for always being there whenever I needed them in my ups and downs during these years. I really feel blessed to have a well wisher like Umaid, who in a very short period of time has become a great friend. I thank him, for being my strength during the last days of my Ph.D life, for all that he has done and continue to do so.
I would also like to thank my batchmates Anasua, Priyadarshini, Richa, Rohini, Sarabpreet, Uttara, Divya, Vineet, Hamid, Ruchir, Rajmohan, Sandeep and Tarun. I feel indebted to Ruchir for helping me in my anti-leishmania experiments patiently, till the completion of the experiments and sharing his knowledge and skills.

Special and sincere thanks to Sweety for her sweet and friendly nature and who has been helpful at all times.

I especially thank, Kewalji and Jagdishji for their immense help and support and making my stay in the lab a pleasant and cheerful experience. Kewalji have been a constant motivating factor for me ever since I joined this lab.

I am grateful to Ashokji for helping me in using gamma counter, Ajayji for lending his timely help in utilising confocal facility, Sundarji for sequencing a vast array of samples. I thank all of them for their support, invaluable guidance and help.

I would be failing in my duty if I did not thank Babulalji and Satishji for their timely help. Without them this thesis would not have been possible. I would also like to thank the staff at NII who has always been there to lend their helping hand in every way ever since I joined this institute.

It is indeed difficult to adequately thank my parents, my sister, Shalini and my brother Deepak, for bearing me patiently in my hours of dilemma and haste and for their love, constant encouragement and sincere moral support when it was needed the most. Mummy and daddy, thank you both so very much, in allowing me to not just dream my dream but enabling me to live it. I feel blessed to have two more members in my family recently, Anju bhabhi and Umesh jiju who brought enormous happiness to our family with their love and care.
