Acknowledgements

It is my pleasure to acknowledge valuable guidance, support and encouragement from Dr. Dhiraj Bora all through this work. My heart feels gratitude to prof Y. C. Saxena for illuminating discussions, considerations and his guidance throughout this work. I am grateful to both of them. I also thank both of them for going through this manuscript and offering me suggestions and comments for the betterment of this work. I am greatly indebted to prof P. K. Kaw for his constant support, encouragement and discussions I had with him during the course of this work. I thank Prof S. D. Verma for useful advices during this work.

I offer my sincere thanks to prof A. Sen and Dr. H. R. Prabhakara for teaching me techniques of nonlinear dynamical system analysis. I thank Dr. G. C. Sethia for software help and useful advices. I am greatly benefited ideas given by Prof P. I. John and Dr. Venkatramani during this study. Theoretical discussions with Dr. R. Singh proved to be very beneficial. My special thanks to Satyanarayana for his technical advices and readiness to help me in any circumstance.

I thank Mohandas and Saradasree for their technical assistance during the experiment. I thank R. N. Mishra of Physical Research Laboratory for giving us instrumentation tape recorder which was used during the experiment. My thanks to Pujara and Panigrahi for preparing the data acquisition system without which this work would not have taken so much shape. I owe immensely to my friends Dr. S. Chaturvedi, Dr. Chenna Reddy, Dr. Puravi, Shishir, Ajay, Bevli, Pradhan, Jaishankar, Sudip, Saji and Biju who in some way or other helped during this work. I thank B. L. Venkatesh, V. S. Venkatesh and T. R. Sridhar for their encouragement. Finally, I warmly thank my wife, Geeta for generously allowing me to devote all my week days and weekends to this work.
