ACKNOWLEDGEMENT

The preparation of this thesis owes several debts of gratitude to my supervisor Prof. Chirstopher S. Raj, who despite his busy academic schedule was always there to help me with much concerned, really overwhelmed for his humbleness, introduced me to good topic with ideas to proceed with related work and stood by me in spite of all odds. He was constantly motivating and enlightened me through his thoughts and suggestions. It would not have been possible for me to accomplish such a Herculean task without his guidance, inspiration and constant support with lots of patience.

I am grateful and also thank to Dr. K. P. Vijaylaxami and Dr. Chintamani Mahapatra for their concerned of me and encouragement.

I am also thankful to my center office faculty for their helpfulness and humbleness, in instant doing our work when needed.

I am indebted to the American Centre Library, WWF library, TERI library, CSES library, IGNOU library, and finally our own University main library and Exim Bank library that provided me the most valuable JSTOR link.

My special thanks to Justin DeNormandie for editing all chapters and also my sister for her giving support when needed.

My friends Aditya, Prasanna, Krishna, who always use to enquire about my work, Divya, Sushree, Sarala Jain, Samatha and Roopali who all appreciated, encouraged me and always boosted me to do and finish the work. Sanghamitra who is submitting with me also was a great help in enquiring the remaining time and the work which need to done completely.

I thank my parents who stood by me and for there extended belief in me and also made all possible necessary available to make me study in this University.

Last but not the least I hold the sole responsible for any mistake in this thesis.

P.K. Vidyavathi
