2. Aim and Objectives

2.1 Aim
Evaluation and validation of traditionally used plants for their hepatoprotective activity by employing suitable animal models

2.2 Objectives
2.2.1 Standardization and evaluation of selected medicinal plant material as per WHO guidelines
2.2.2 Marker based standardization of different extracts of selected medicinal plants using HPTLC
2.2.3 \textit{In vitro} evaluation of standardized extracts of selected medicinal plants for antioxidant, and hepatoprotective activity
2.2.4 \textit{In vivo} evaluation of standardized extracts of selected medicinal plants for hepatoprotective activity
2.2.5 Isolation of possible phytoconstituents
