ACKNOWLEDGEMENT

Life is a pure flame, and we live by an invisible Sun within us. As I tread back through the path of my life, I feel that it was abounding in happiness and satisfaction. Without doubts, this was a novel period and a milestone in my life, where I encountered joys and hurdles that came along the flow. It was this period that made me what I am today, a body that has found its soul.

At times our own light goes out and is rekindled by a spark from another person. Each of us has cause to think with deep gratitude of those who have lighted the flame within us.

Gratitude is a memory of the heart and I owe mine to a lot of people. I pay my heartfelt gratefulness to that multi-faceted person, who helped me to breeze into this fascinating terrain of neurons and neurotransmitters. He is the mentor of my Ph.D. life, Dr. C. S. Paulose, an exceptional individuality, who has always been patient and tolerant towards me. He has taught me that there is a single light of science, and to brighten it anywhere is to brighten it everywhere. Without his constant guidance and ever inspiring encouragement during the tenure, this work would not have been possible. I am deeply obliged to him for the successful completion of my Ph.D. I sincerely express my heartfelt thankfulness to this visionary.

Next, I would like to express my sincere indebtedness towards a rare personality who is a powerful organizer, a great scholar and a loving abecedary. I am indebted to him for developing my personality. He was the light who guided me, my body and my soul, who has always made me credent in myself. He is my Jayettan (Shri. A Jayakumar), pivot of Swadeshi Science Movement. He taught me, making his own life an example that only a life lived for others is a life worthwhile. I would like to express my unfathomable respect towards this great soul.

I would like to acknowledge Prof. M. Chandrasekaran, former Head of our Department, Dr. Sarita G. Bhat and Shri Elyas K. K., lecturers of our Department for their help and encouragement throughout my work.

I am also beholden to Dr. V. P. N. Nampoori, the embodiment of love and dedication for the special care and affection that he has always shown to me.

I would like to extend my profound thankfulness to Dr. Babu Philip, Department of Marine Biology, Microbiology and Biochemistry for his valuable suggestions and encouragement. I also remember Dr. Ramesh Kumar.
Endocrinology and Immunology Lab, Cochin, with thanks, for his kind help for doing the hormonal assays. I take this opportunity to thank Dr. K. P. Rajappan Nair, former Dean, and Faculty of Science, Cochin University of Science & Technology for his encouragement and support to me.

I am grateful to Dr. Jackson James, Dr. Biju M P, Dr. Ani Das V, Dr. Pyroja S, Dr. Eswar Shankar P N and Dr. Renuka T R, who have traversed this aisle before me. I am much indebted for their immense help and encouragement.

I am wordless in expressing my sincere gratefulness to my confidant, Dr. Mohanan, who has always loved and endured me, helped me to stride along the right path and has always prayed for my annexation and eminence.

My juniors, Mr. Santhosh Thomas K, Mr. Akash K George, Mr. Gireesh G, Ms. Finla Chathu, Mr. Reas Khan, Ms. Remya Robinson, Ms. Savitha Balakrishnan, Mr. Binoy Joseph and Ms. Anu Joseph, Ms. Nair Ameer Krishnakumar were always with me, lending a helping hand. I thank them all for the affection, love and friendship showered on me.

I would also like to thank Ms. Sreeja Chellappan, Mrs. Jasmin C., Mr. Soorej M. Basheer, Mr. Madhu K. M., Ms. Archana Kishore, Mr. Bernard Rajeev SW., Ms. Lailaja V. P, Ms. Bijna, Mrs. Manjusha, Ms. Jissa and Mr. Siju M Varghese, research scholars of the Department of Biotechnology, for their kind help and cooperation during the period of my Ph. D.

I thank Dr. Naseema A, Dr. Swapna T. S, Dr. Rajeev Kumar S and Dr. E. V. Dasan for their affection and support during the course of my work. I also thank Mr. Deepu Oommen, Mr. Santhosh C V, Mr. Jyothi T M, Mr. Ram Mohan, and for their endless affection to me. I thank all the M. Sc. Students who are and were here during the course of my work in the Department of Biotechnology for their endearment, help and co-operation. I am especially thankful to Ms. Ramya Krishnan for her endearing encouragement.

I am grateful to Indian Council of Medical Research, New Delhi for providing me fellowship for research.

I thank all the teachers of my school days and graduation for their kind leading and the affection that they have showered on me.

I thank all the non-teaching office staff of our department-present and past for their timely help and cooperation.
I specially thank Mr. Suvi Vijayan, Bachelor of Fine Arts from Sree Sankara Sanskrit University, Kalady, a promising artist, for designing the cover of my thesis who blended the colours with the warmth of his friendship.

All this would have been impossible without the love, affection and care shown by my parents who whole heartedly supported me to enter the field, my sisters, who have never failed to inspire me, and my uncles and their families who have always cheered me up.

As my life unfolds itself and as I descend the stairs of my Ph.D. period from this Sacramental institution where I spent a good part of my life, I feel myself bristling with the sempiternal truths of the universe and a seraphic light that fills my soul. I feel that this moment will last perpetually. Creation, Destruction and all the other mystiques of life unfurl before my eyes and I find myself in the coarsest and the finest.

Last but not the least; I would like to adduce the almighty lord Narasimha, who has always watched over me, filling me with fortitude and the insight to see things au fait. To the great altruist of the universe, I hereby pay my heartfelt tribute. I dedicate myself to thee....

(Balarama Kaimal S)
