ACKNOWLEDGEMENTS

It is with a profound sense of gratitude that I acknowledge my indebtedness to my supervisors, Dr M N Giri Prasad and Dr S Varadarajan for their congenial guidance. Their infinite patience, vast knowledge, constant motivation and support has contributed greatly to the completion of this work.

I would like to thank my fellow researchers, D Srinivasulu Reddy, M Sadasiva and N Ramamurthy for their invaluable assistance, rendered in the development, testing and validation of the algorithms and in compilation of the thesis.

I owe a measure of gratitude to my organization, PBR Visvodaya Institute of Technology and Science, Kavali for providing the intellectual environment in pursuit of excellence in my research activity. Also, the ready guidance provided by the research cell at my parent university, JNTUA, Anantapuramu has been of great help in my work.

It goes without saying that it would have been impossible for me to carry out this research work without the support of my family – my parents, Prem Chandra Reddi and Nirmala, who remain a continuous source of strength and inspiration for me, my brother, Sasmith who has always been there when I needed him, my husband, Vidyadhar for his quiet and unfailing support and the cheerful presence of my precious children, Likhith and Natya. Without you all, this work would not have been possible. Thank you so much.

D Prathyusha Reddi
