ACKNOWLEDGEMENT

Over the years from the earliest planning stages to completion of this thesis I am deeply indebted to Dr. Kasturi Datta for her expert guidance and judicious comments during the course of this investigation. I owe a great deal to her and also to my teachers in Santiniketan who taught me whatever I have learnt in science. Prof. A.B. Das, Dr. Arun Lahiri Majumdar, Prof. Shelley and Samir Bhattacharya deserve special mention here.

I would like to thank Ex-Deans and Prof. V. Subramanian, Dean, School of Environmental Sciences, for providing me with the basic laboratory facilities. I take this opportunity to thank the teachers and students of Centre for Biotechnology and School of Life Sciences for allowing me to use their laboratory facilities.

I wish to extend a very special vote of thanks to Professors Asis Datta, H.K. Das, Anjali Mookerjee, S.K. Kar, Sudha and Alok Bhattacharya for their constant help and encouragement during my stay in the alma mater.

I am grateful to Dr. V.K. Chauhan, Dr. V. Manivel and Mr. R.K. Arora for their help in N-terminal sequencing and amino acid analysis at the International Centre for Genetic Engineering and Biotechnology (ICGEB), New Delhi.

My personal and deep appreciation goes to my seniors, Drs. Kishalay Hoare, Nishi Kant Singh, Natarajan, Venkatesh and Raina who have been of immeasurable value to me, both, academically and otherwise.

I owe my deep gratitude to those friends who went out of their ways to help me in their laboratories during late nights and whose names necessitate anonymity.

I was helped by my wife, Mamtta, and also my colleague friend, Babu, who proof-read the entire manuscript at each stage of its development and offered invaluable support and criticism. At several places not only have outright mistakes been removed but a clearer sentence, a more orderly line of thinking exists because of their tireless efforts. The errors and infelicities that remain, I must acknowledge, are my own.

Most of all, I express my deep gratitude to my parents and family members for their constant moral support, patience and encouragement.

I have called upon my friends and colleagues very liberally, who have supported me in many ways but for the fear of omitting someone, I decided not to acknowledge individuals by name. Thanks be to all.
Thanks are due to Dr. V.C. Tyagi and the staff of the Animal House for their help in maintenance of experimental animals. I appreciate Sanjay Gandhi and Biswajeet who faithfully and efficiently performed the multitude of little chores involved in this project.

I express my sincere thanks to Mr. Ishwar Kumar for expert word processing, Mr. R.N. Saini and Mr. Chinmoy Nath for making neat line diagrams and photographs.

Financial assistance from the University Grants Commission, New Delhi, is gratefully acknowledged.

To each I extend my sincerest thanks.

RAKESH
