Acknowledgement

I would like to express my deep gratitude to Professor Predhiman Kaw for being such a wonderful advisor. He always had time for me inspite of his extremely busy schedule. When I asked him a question, however obscurely, he would understand what I was trying to say. He is very direct, so he would tell me exactly where I stood, and what I needed to do next. He has great insight, and a truly amazing clarity of thoughts. One of my fondest memories about him is to observe the way he approaches a problem, solves it and presents the result in the clearest possible manner. No room for heavy jargon and expletives that would obfuscate the physics and make the problem more arcane than it was in the beginning. I am grateful to him for providing me enough independence and flexibility. The most fruitful times I’ve ever had have been working with him. It has been one heck of a learning time. I consider myself extremely fortunate to have had the opportunity to work with him.

I would like to thank Dr. Raghvendra Singh for devoting so much time with me, explaining many things. He always answered my queries and has taught me a great deal. He is the one who has introduced me to the exciting world of plasma instabilities.

I thank Dr. Shishir Deshpande for providing me his full support in the understanding of the simulation and the many hours of discussion to interpret the numerical results and construct an analytical model.

The whole simulation problem would not have taken off if Manoj Warrier didn’t get involved. It is because of him that I got initiated into the numerical simulation. I have learnt a huge amount from him, and would like to thank him very much for putting up with a lot of ignorant questions, and for spending time explaining many things to me. Working with him has been truly invaluable.

Dr. Hari Ramachandran deserves a special mention. He gave us an excellent course on Plasma Physics, and has answered the many questions I have asked him.

I am also thankful to Professor Abhijit Sen for providing me many opportunities to participate in the various schools and workshop, and for taking a keen interest in my work. Dr. S. N. Bhattacharya deserves credit for his concern, support and encouragement during the tenure of this work, and Dr. Parvez Guzdar for providing a very useful numerical knowledge.

I thank Sudip Sengupta for his help with the LCPFCT program, and the many smoking sessions (not to forget the other cigarette buff Manoj Warrier) that we have had.

Thanks are also due to Indranil Bandhopadhayay, R. Srinivasan, and D. Raju for the numerous enjoyable discussions we have had in the post lunch session.

I now would like to express my thanks to my colleagues and friends out here in JPR, namely, N. Ramsubramanian, R. Sudha, Aniruddha Sengupta, M. Venkatramanan, R. Ganesh, Sangeeta Mahajan, S. Dastgeer, Deepak Gupta, Monojoy Goswami, Devendra Sharma, Ramana Reddy, G. Ravi, S. K. P. Tripathi, Shantanu Karkari, B. M. Veeresha, Sambaran Pahari, Vipin Yadav, Anuj Agarwal, Shahid Ahmed, S. Poornkala, Varun Tangri, M. Kundu, Aditya, C. Ramdas, Ramesh Kumbhare, Harish, Dr. Srivatsan, Dr. Maqbool Ahmed, Sanket Goel, Amit Garg, Hemant, and Santosh Dubey. Ramsubramanian and
Sudha deserve a special mention. We have spent some of our finest moments as neighbours in G-3 and G-4 of IPR Hostel.

The Library staff (Mrs. P. J. Pathak, Das Madam, Amola, Saroj, Anjila), Academic Committee, P. Balachandran, and the Computer Centre staff, deserve thanks for extending their support and facilities.

I would now like to thank my best friends Dr. Siddhartha Dutta, Shantanu Bhattacharyya, and G. Sriram for their unflinching love and support over the past fifteen years. I simply cannot forget the hiking, cycling, listening to music (from Metallica to Mozart), movies (From Good, Bad to downright Ugly !!), gluttony, philosophy to philandering, simply freaking out, and all the pleasure and pain of our growing up years.

I have received tremendous support from my in-laws and I am extremely thankful to them for their faith and unstinted support.

I now wish to thank my Father, Mother, and my Brother for their belief in me. This work would have never been complete without their patience all these long years and above all, their huge encouragement, love, and support. I dedicate this thesis to my Mother and Father. My Father's life has always been exemplary for me in every aspect.

Finally, I want to thank the love of my life, my better-half, Dr. Priyanka Goswami. Marriage to her is simply the best thing that has happened in this life of mine.
