<tr>
<td>I</td>
<td>INTRODUCTION</td>
<td></td>
</tr>
<tr>
<td></td>
<td>(a) Brief review of proteins, amino acids, oils, carbohydrates, trace nutrient and toxic cations.</td>
<td>1 - 6</td>
</tr>
<tr>
<td></td>
<td>(b) Review of chromatographic techniques of analysing amino acids, fatty acids, carbohydrates and cations.</td>
<td>6 - 8</td>
</tr>
<tr>
<td></td>
<td>(c) Literature Survey.</td>
<td>9 - 10</td>
</tr>
<tr>
<td></td>
<td>(d) Problem taken and work done.</td>
<td>10 - 12</td>
</tr>
<tr>
<td>II</td>
<td>(a) Brief description of seeds analysed.</td>
<td>13 - 16</td>
</tr>
<tr>
<td></td>
<td>(b) Material and methods, determination of proximate composition of seeds, isolation of oils and fats, isolation of fatty acids, conversion of fatty acids into methyl esters for paper, thin layer and gas chromatographic analysis.</td>
<td>16 - 17</td>
</tr>
<tr>
<td></td>
<td>(c) Isolation of sugars for chromatography, preparation of acid and alkaline protein hydrolysate of seed meals, for chromatography of amino acids, and preparation of solution for chromatography of cations present in seeds.</td>
<td>17 - 18</td>
</tr>
<tr>
<td></td>
<td>(d) Unidimensional paper and cellulose thin layer chromatography of authentic amino acids and protein hydrolysates.</td>
<td>19 - 21</td>
</tr>
<tr>
<td></td>
<td>(e) Circular paper chromatography of amino acids and acid protein hydrolysates of various seeds.</td>
<td>21 - 22</td>
</tr>
<tr>
<td></td>
<td>(f) Two dimensional paper and cellulose thin layer chromatography of acid protein hydrolysates. Staining reagents used for identification of amino acids.</td>
<td>22 - 24</td>
</tr>
<tr>
<td></td>
<td>(g) Quantitative two dimensional chromatography of acid protein hydrolysates of various seeds and quantitation of amino acids by automatic HPLC technique.</td>
<td>24 - 26</td>
</tr>
<tr>
<td></td>
<td>(h) Paper and thin layer chromatography of fatty acids and their methyl esters. Quantitative analysis of oils by GLC technique.</td>
<td>26 - 27</td>
</tr>
<tr>
<td></td>
<td>(i) Paper and thin layer chromatography of sugars.</td>
<td>27 - 29</td>
</tr>
<tr>
<td></td>
<td>(j) Paper chromatography of cations using different staining reagents. Quantitation of some cations by atomic absorption spectrometry.</td>
<td>29 - 31</td>
</tr>
</tbody>
</table>
(a) Photographs of unidimensional ascending paper and cellulose thin layer chromatograms of seed protein hydrolysates and their description.

(b) Photographs of circular paper chromatograms of seed protein hydrolysates and their description.

(c) Photographs of two dimensional ascending paper chromatograms of seed protein hydrolysates and their description.

(d) Photographs of two dimensional descending paper chromatograms of seed protein hydrolysates and their description.

(e) Photographs of two dimensional ascending thin layer chromatograms of seed protein hydrolysates and their description.

(f) Photographs of unidimensional ascending paper chromatograms of sugars and their description.

(g) Photographs of unidimensional ascending paper chromatograms of mixture of cations, ash of various seeds and some alloys.

(h) Seed compositional data and physico chemical constants of their oils. Tables : 1 & 2.

(i) $R_f$ values of authentic amino acids (Tables : 3 & 4) and their graphic representations.

(j) Amino acid compositional data of various seed proteins. Tables 5 - 17.

(k) $R_f$ values of fatty acids and their methyl esters (Tables : 18 & 19) and their graphic representation.

(l) Fatty acid compositional data of various seed oils. Tables : 20 - 25.

(m) $R_f$ values of authentic sugars (Tables : 26 - 27), their graphic representation and percentage of sugars in various seeds. Table : 28.

(n) Cation compositional data of synthetic mixture and, some alloys (Table : 29) and various seeds. Table : 30.

(a) Discussion.

(b) Summary of the thesis.

(c) References.
