ACKNOWLEDGEMENT

It is a pleasure to record a deep sense of gratitude to Dr. (Miss) H. Mohabey, M.Sc., Ph.D., Professor and Head, Department of Chemistry, Govt. Digvijai P.G. College, Rajnandgaon, whose informal attitude together with her inspiring guidance contributed to the completion of my thesis, without which this study could not have been possible.

I express my sincere gratitude to Dr. R.K. Mishra, Professor, Department of Chemistry, Ravishankar University, Raipur and Dr. S.G. Tandon, Head, Department of Chemistry, Ravishankar University, Raipur for generous help and silent encouragement given, at every stage of the present work.

I am thankful to Professor I.F. Tiwari, Principal, Govt. Digvijai P.G. College, Rajnandgaon for providing laboratory facilities.

I am grateful to Dr. J.P. Mishra, Asstt. Director, R.R. Labs, Hyderabad (A.P.), C.D.R.I., Lucknow (U.P.) for giving analytical results including I.R. measurements.

I am greatly indebted to Professor Dr. V.K. Mohabey, Department of Physics, Kalyan Mahavidyalaya, Bilai for his help in the study of magnetic properties of the complex.
I acknowledge the invaluable help rendered by Prof. D.S. Bhardwaj, Prof. K.N. Sharma, Prof. S.C. Tiwari, Prof. A.K. Mishra and Dr. (Miss) Neera Mishra during the course of this work.

Last but not the least I acknowledge my gratitude to my mother, sister Dr. Suruchi Mishra and my colleagues Miss Sushama Yadu and Miss Rita Shrivastava, who were a source of inspiration throughout my research work for which I am much indebted.

Finally I wish to dedicate this thesis to my Father and Grand Father who had strongly motivated me to start this work.

Indumati Mishra
