Chicago, Illinois, USA for HES cell line and Dr. David G. Kaufman, University of North Carolina at Chapel Hill, North Carolina, USA for Sht 290 cells. I owe my cell biology work to each of them.

I would also like to thank Pavan, Bhuban, Shaheen, Pragya, Anurag, Ashaq, Adil, Poornima, Vijay, and all my batchmates for their cooperation and support throughout my PhD.

This acknowledgement will be incomplete without the mention of few special people who had not only helped me in learning various techniques but also for making me feel comfortable in CCMB and also for their continued support and creating a fun-filled environment throughout my Ph.D. It is because each of them, my Ph.D. journey was memorable and successful. I will always remember and cherish each and every moment spent with my four special friends, Madhobi, Nitin, Venkatesh, and Kapil. Its because of them, I had never missed my family during my stay in CCMB. We have shared a lot more than this, movies, science, brainstorming sessions on varied topics and definitely I thank them for becoming guinea pigs for my cooking experiments. I will always relish the time spent with Madhavi. We had wonderful tea-times and joy filled gatherings during weekends. All my cloning work would have not been possible without the help and guidance of Yatender. I also thank him for helping me in making viral constructs. My Ph.D. would have never taken this form without the support of Venkatesh. I thank him for helping me at various stages of my Ph.D. and especially for his help in proteomics related work. Special thanks to Nitin and Madhavi for the critical proof-reading of my thesis.

My family has been a constant source of strength and support to me. I express my sincere gratitude to each and every member of my family for their unconditional love, support, and encouragement. It is only because of them that I reached this stage of my life. My mummy and papa have been the best support and are a major contributory factor for the success of my research project, and without their encouragement and understanding it would have been impossible for me to finish this work. I am deeply thankful to Rajesh, for his understanding and tremendous support especially during the last phase of my Ph.D. I am also greatly thankful to my in-laws for their constant prayers for my success and for their continuous support during the last phase of my Ph.D.

The financial support of CSIR is gratefully acknowledged.
