CHAPTER 2
MATERIALS AND METHODS
2.1 Materials 42
2.1.1 Chemicals 42
2.1.2 List of antibodies 42
2.1.3 Subjects 43
2.1.4 Cell lines 44
2.1.5 Bacterial strains 45
2.1.6 Plasmids 45
2.2 Methods 45
2.2.1 Endometrium histology 45
2.2.2 Protein extraction from human endometrium tissue samples 46
2.2.3 Protein gel electrophoresis 46
2.2.3.1 Two-dimensional PAGE (2D-PAGE) 46
2.2.3.2 Sensitive colloidal staining 47
2.2.3.3 Image capture and PDQuest analysis 48
2.2.3.4 In-gel digestion and protein identification by mass spectrometry 48
2.2.3.5 SDS-polyacrylamide gel electrophoresis (SDS-PAGE) 49
2.2.3.6 Western blot analysis 49
2.2.4 Immunohistochemistry 50
2.2.5 Bacterial cloning 51
2.2.5.1 Plasmid isolation 51
2.2.5.2 Quantitation of nucleic acid 52
2.2.5.3 Agarose gel electrophoresis 52
2.2.5.4 Restriction endonuclease digestion 53
2.2.5.5 Gel elution of DNA fragments 53
2.2.5.6 Ligation 53
2.2.5.7 Preparation of ultracompetent cells 53
2.2.5.8 Transformation of *Escherichia coli* 54
2.2.5.9 DNA sequencing 54
2.2.6 Construction of Adenoviral vectors 55
2.2.7 Cell Biology Techniques 58
  2.2.7.1 Maintenance of cell lines 58
  2.2.7.2 Transient transfection of cell lines 58
  2.2.7.3 Antibody staining of cells 59
  2.2.7.4 Fluorescence and confocal microscopy 59
  2.2.7.5 Coimmunoprecipitation 60
  2.2.7.6 MTT [3-(4,5-Dimethylthiazol-2-yl)-2,5-diphenyltetrazolium Bromide] Colorimetric Assay 60
  2.2.7.7 Cell adhesion assay 60
  2.2.7.8 Cell proliferation assay 61
  2.2.7.9 Wound healing assay 61
  2.2.7.10 Matrigel invasion assay 62
2.2.8 Statistical Analysis 62
2.3 References 63

**CHAPTER 3**

**RESULTS**

3.1 Introduction 64
3.2 Results 66
  3.2.1 Proteome of human endometrium 66
  3.2.2 Differential protein expression of endometrium tissue from secretory and proliferative phase 85
  3.2.3 Comparison of protein expression in proliferative phase eutopic endometrium from women with and without endometriosis 89
  3.2.4 Comparison of protein expression in secretory phase eutopic endometrium from women with and without endometriosis 98
  3.2.5 Validations of differential proteins by immunoblotting 99
  3.2.6 Validations of differential proteins by immunohistochemistry 104
  3.2.7 Expression of DJ-1 in normal and endometriotic cell lines 110
  3.2.8 DJ-1 protects against oxidative stress induced apoptosis 110
  3.2.9 Overexpression of DJ-1 leads to increased adhesion of normal endometrial epithelial cell 112
CHAPTER 4
Discussion
4.1 Proteome of human endometrium: Identification of differentially expressed proteins in proliferative and secretory phase endometrium
4.1.1 Structural proteins
4.1.2 Molecular chaperones
4.1.3 Immunity related proteins
4.1.4 Metabolic Proteins
4.1.5 Signal transduction
4.1.6 RNA biogenesis, protein biosynthesis, and nuclear proteins
4.2 Differential proteome profiling of eutopic endometrium from women with endometriosis to understand etiology of endometriosis
4.3 Role of DJ-1 in pathogenesis of endometriosis
4.4 References

CHAPTER 5
CONCLUSIONS AND FUTURE TRENDS
5.1 Conclusions
5.2 Salient findings of the thesis
5.3 Future trends
