ACKNOWLEDGEMENTS

This is to place on record my deep sense of gratitude to all those whose guidance, support and encouragement stood me in good stead in the successful completion of this research work of mine.

My guide, Dr. K. Jayakumar was always there with his accessibility and availability inspiring me first and guiding me thereafter. The extensive discussions I had with him had a direct impact on the final form and quality of this dissertation. I, hereby express my sincere gratitude to him for his invaluable guidance and unqualified support, without which this doctoral dissertation would not have become a reality.

I am beholden to all the members of the Department of Statistics, University of Calicut, both teaching and non-teaching, for their help and co-operation during my research period. In this connection, my thanks are also due to Dr. Thomas Mathew, Lecturer Senior Scale, M.D. College, Pazhanji for the kind help he extended in terms of the computation work for the study.

As a special mention, I gratefully recall the boundless help and co-operation I got from the Manager and the Principal of my parent institution, Sir Syed College, Taliparamba for doing the research work availing myself of the Teacher Fellowship Scheme of University Grants Commission, India. I hereby express my indebtedness to them.
This acknowledgement will be far from complete if I fail to make a mention of the boundless help and support I got from a different quarter comprising my family and friends. Let me express my thanks to all these near ones and dear ones who enthused me and stood by me throughout my research work.

Calicut University Campus,
19-10-2006.
