LIST OF TABLES:

1. Total outlay on Community Development programme and people's contribution during the period of 18 years.
2. Package districts in the country.
3. Removal of Nitrogen, Phosphatic acid and potash per acre.
4. Average annual rainfall during 1956-60 in Raipur district.
5. Chemical composition of soil.
6. Average yield of food crops in the district prior to package programme.
8. Information regarding the co-operative societies.
9. Basic data regarding the 16 blocks of the district. Package programme.
10. Consumption of fertilisers and area benefited.
11. Correlation between the consumption of fertilisers and irrigation facilities.
12. Zonal distribution of stage II villages.
13. Pattern of land holding.
14. Participation of small, medium and large farmers.
15. Consumption of fertilisers by small, medium and large farmers.
16. Percentage area covered under improved varieties.
17. Yield rates of paddy on small, medium and large holdings.
18. Example illustrating the relationship between yield level and size of holding.
19. Representation of the farmers in the village institutions.
20-Number of small, medium and large farmers holding the post of president in co-operative societies.

21-Doses of fertilisers recommended at the time of inception of package programme.

22-Doses of fertilisers recommended in 1967-68 for Raipur district.

23-Area covered under different doses of fertilisers in stage II villages of Abhanpur block.

24-Input-output relationship at different doses of fertiliser.

25-Labour charges per acre and number of days.

26-Input-output relationship at different prices.

27-Area under high yielding varieties paddy in 12 stage II villages of Bhatapara and Abhanpur development block.

28-Amount of credit borrowed from credit agencies.

29-Amount of loan granted to the farmers during the period of ten years.

30-Preparation of farm plans for small, medium and large farmers.

31-Year wise distribution of medium and long term credit.

32-Time consumed in advancing loans.

33-Linking in the district during past 10 years.

34-Comparison between estimated and actual crop yield.

35-Comparison between estimated and actual crop yield on Taichung Native -1.

36-Input-output relationship on T.N.-1.

37-Farm plans prepared and financed.
38—Adoption of farm planning technique by the farmers.
39—Yield rates of participants and non-participants.
40—Labour force and proportion of women labour force.
41—Local weights.
42—Daily wages according to the intensity of work.
43—Kind wages in terms of paddy.
44—Wage rates of attached labourers for a year in zone I.
45—Wage rates of attached labourers for 11 months in unirrigated areas.
46—Income and expenditure of the labourers.
47—Linking of credit with marketing.
48—Difference between the support prices and the prices received by the farmers.
49—Resources of the co-operative marketing society Bhatapara.
50—Value of paddy purchased and liked.
51—Balance sheet of Bhatapara marketing society.
52—Basic data regarding the stage II villages.
53—Land holding pattern.
54—Participation of farmers.
55—Area under improved package of practices.
56—Yield rates per acre.
57—Input-output relationship in stage II villages.
58—Basic data regarding Bhatapara and Bilaigarh blocks.
59—Pattern of land holding in Bhatapara and Bilaigarh blocks.
60—Preparation and implementation of farm plans.
61—Distribution of fertilisers in Bhatapara and Bilaigarh blocks.
62-Distribution of paddy and wheat seeds.
63-Distribution of plant protection chemicals.
64-Area under different package of practices.
65-Yield rates.
66-Input-output ratio of paddy crop.
67-Correlation between rainfall and yield rates.
68-Distribution of fertilisers in different years.
69-Quantity of improved seeds distributed and area covered in different years.
70-Progress made by soil testing laboratory.
