ACKNOWLEDGEMENT

At the outset, I thank Almighty God for giving me the strength to pursue and complete this research study.

My deepest respect and gratitude are due to my guide and advisor Dr. Bhaskarananda Kumar, for his guidance and constant support during the course of this study. He has been and continues to be a source of inspiration at every stage of this work, sharing his expertise, thoughts and experience.

I would like to extend my sincere thanks to Dr. Anil K. Bhat, my co-guide for his enthusiasm, inquisitive thought of mind and for always pushing me that little bit further.

I am thankful to Dr. Sreekumaran Nair, Professor of Biostatistics, KMC, Manipal, for his advice in using appropriate statistical tools in data analysis.

I express my sincere appreciations to Dr. B. Rajashekhar, Dean, MCOAHS, Manipal, for being an inspiration to me.

I am indebted to all who participated in the study including the laterite stone cutters who gave their gracious time for this study. My thanks also go to the contractors and builders who were a point of contact between me and the laterite stone cutters.

At this juncture I remember all my former teachers and colleagues at the Department of Physiotherapy, MCOAHS, Manipal, for sharing their abundant knowledge and skills with me. I am grateful to Dr. Arun Maiya G., Dr. Kavitha Raja, Ganesh Balthillaya and Vishweshwar Bhat, my former colleagues for their support.

My special thanks are extended to Ravindra Prabhu, Raviraj Nayak, Sathyaganapati, Uday Kumar and Vijay Kumar. Their support has been invaluable in the completion of this project.

I express my deep gratitude to my mother Saraswathi Prabhu, my brother Mahabaleshwar Prabhu, my brother-in-laws Venkatesh Prabhu and Krishnamurthy Nayak, my wife Vinaya, and children Shivani and Roshni for their love, support and encouragement and for absorbing much of my stress during the study.

I, with due respect dedicate this thesis to my father Manjunath Prabhu, who is no more with us to see the completion of this project.
