LIST OF PUBLICATIONS

'Evidence for equatorial thermospheric heating due to SC associated hydromagnetic waves'

'Detection of nebulosity around stars using a Fabry-Perot spectrometer: a new technique'

'Evidence for a large scale electric field gradient at the onset of equatorial spread-F'

'Thermospheric diffusion and temperatures at twilight using artificial vapour releases'

'Rocket borne payload electronics system for 1.27μ airglow'

'1.27μ Rocket infrared payload for measurement of ozone'

'A study of the velocity structures of the planetary nebulae NGC 6720 and NGC 6210 using a pressure scanned photo-electric Fabry-Perot spectrometer'
