Acknowledgements

I thank Dr. K. S. J. Rao for giving me a wonderful opportunity to work in his group and begin my research carrier in the field of Clinical Biotechnology and Bimolecular Spectroscopy. I thank him for his guidance and encouragement throughout my research. He supported me to transform myself from technical man with biology to biotechnologist with biophysical awareness and enlightening my knowledge in DNA conformation and stability. Above all, he gave me enough time to learn all the experimental techniques and laid the foundation for my future carrier in research. During the period of my research, Dr. Rao shifted to Panama, as Director of the Institute of Scientific Research and High Technology services, INDICASAT AIP, Republic of Panama. I am very grateful to him for providing every possible help I needed to complete my work. He took all possible care and steps to ensure that my research work should not get affected due to the shift from CFTRI, Mysore to Panama, in spite of his extremely busy schedule, he was always available for any kind of help that I needed. His patience and understanding especially in
times of stress made it possible for me to bring this thesis to its present state.

I thank **Prof. K. R. S. Sambashiva Rao** for his constant support, encouragement, guidance and concern for my research and every support during my research work.

I extend my thanks to **Dr. P. Sudhakar**, Coordinator, Department of Biotechnology, Acharya Nagarjuna University, for his timely help and encouragement during my course of research work. I also thank the teaching and non-teaching members of the department of Biotechnology for their timely help.

I thank **Dr. U.J.S. Prasada Rao**, Senior Principal Scientist, CFTRI, Mysore, where part of the data was collected. His highly valuable comments on my research work, all kinds of support, help, encouragement and sincere concern during my Ph.D. He supported me for the evaluation of results and critically evaluating the thesis. The research students **Mr. Girish** and **Mr. Shaik Akbar Basha** gave wonderful company during my stay at Mysore.
I thank Dr. P. Vasudevaraju for enlightening my knowledge on agarose gel electrophoresis and other biochemical and biophysical techniques. I really admired the way he looked the problem, totally in another perspective.

I thank Prof. Dipankar Chatterjee, Chairman, Molecular Biophysics Unit, Indian Institute of Science, Bangalore, Prof. Raghavan Varadarajan, and Prof. S. P. Siddhartha Sarma for giving me an opportunity to use their lab, helpful discussions, needful comments, suggestions and their encouragement during my work by providing a wonderful working environment.

I am thankful to Prof. P. Balaram, Director, and Prof. N. Balakrishnan, Associate Director, Indian Institute of Science, Bangalore for permitting me to carry out Ph.D.

I thank Mr. H. S. Shekar of KIMS, for his fruitful discussions and comments on my research work.
I thank DBT and DST, Government of India, for generously funding the spectroscopic facility to the MBU department, IISc, Bangalore.

I thank my wife and children for being very supportive and for the confidence they had on me. It is their wishes and prayers which made this thesis possible.

Finally, I thank all those who have helped me directly or indirectly in the successful completion of my thesis

(M. Govindaraja)
