LIST OF FIGURES

Fig. 1.1  Volume temperature graph for glass
Fig. 1.2  Two dimensional schematic of crystalline and Non-crystalline (glass) materials
Fig. 1.3  Structure of glass with modifier oxides
Fig. 1.4  Penetration of different types of radiation
Fig. 1.5  Tetrahedral coordination of Si
Fig. 1.6  Symmetric stretch vibrations of the boroxol ring
Fig. 1.7  (a) Regular octahedron point group
(b) Regular tetrahedron point group
Fig. 1.8  Five d orbitals of $T_{2g}$ orbitals and $E_g$ orbitals
Fig. 1.9  Energy spectra of transition metal ions
Fig. 1.10 Zeeman energy for a single unpaired electron as function of magnetic field $H$
Fig. 1.11 A schematic Raman spectrum
Fig. 2.1  illustrates automatic temperature controlled furnace along with annealing furnace
Fig. 2.2  The schematic diagram of general X-ray diffractometer
Fig. 2.3  Abbe refractometer (Model NAR-4T)
Fig. 2.4  JASCO Model V-670 UV-Vis-NIR spectrophotometer
Fig. 2.5  Schematic diagram of the optical system of the spectrophotometer
Fig. 2.6  Schematic diagram of electrical system of the spectrophotometer
Fig. 2.7  Photon Technology International fluorescence spectrophotometer
Fig. 2.8  Luminescence spectra recording mechanism
Fig. 2.9  JEOL ESR spectrometer
Fig. 2.10  Principle of a microwave spectrometer used for recording ESR signal
Fig. 2.11  Schematic diagram of the JEOL ESR spectrometer
Fig. 2.12  (a) ESR absorption curve
(b) ESR differential curve

Fig. 2.13  JASCO-FT/IR –5300 spectrophotometer

Fig. 2.14  Raman Spectrometer (Bruker FRA 106/ RFS)

Fig. 3.1  XRD pattern of SA-3 glass sample before and after gamma irradiation dose

Fig. 3.2  Density and molar volume of SA-3 glass sample as a function of irradiation dose

Fig. 3.3  Optical absorption spectra of SrO–B$_2$O$_3$–SiO$_2$ glasses mixed with (a) 5.0 mol% (b) 7.5 mol% (c) 10.0 mol% of Al$_2$O$_3$ irradiated with different doses of gamma rays

Fig. 3.4  (a) PL spectra of glass SA-1 irradiated with doses
(b) PL spectra of glass SA-2 irradiated with doses
(c) PL spectra of glass SA-3 irradiated with doses

Fig. 3.5  ESR spectrum of SA-3 irradiated with different doses of gamma rays

Fig. 3.6  (a) FTIR spectra of SA-1 glass sample before and after gamma irradiation dose
(b) FTIR spectra of SA-2 glass sample before and after gamma irradiation dose
(c) FTIR spectra of SA-3 glass sample before and after gamma irradiation dose
(d) The variation of relative intensities of BO$_3$ and BO$_4$ structural units of SA-1, SA-2 and SA-3 glasses as a function of different doses of gamma rays

Fig. 3.7  (a) Raman spectra of glass SA-1 irradiated with doses of (1) 0 kGy (2) 1 kGy (3) 10 kGy and (4) 30 kGy
(b) Raman spectra of glass SA-1 irradiated with doses of (1) 0 kGy (2) 1 kGy (3) 10 kGy and (4) 30 kGy
(c) Raman spectra of glass SA-1 irradiated with doses of (1) 0 kGy (2) 1 kGy (3) 10 kGy and (4) 30 kGy

Fig. 4.1 (a) XRD pattern of SG-3 glass sample before irradiation and (b) XRD pattern of SG-3 glass sample irradiated with 30 kGy dose

Fig. 4.2 FTIR spectra of SrO–B₂O₃–SiO₂ glasses before irradiation with (a) 1.0 mol% (b) 2.0 mol% (c) 3.0 mol% of Ga₂O₃

Fig. 4.3 FTIR spectra of SG-1 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.4 FTIR spectra of SG-2 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.5 FTIR spectra of SG-3 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.6 Raman spectra of SrO–B₂O₃–SiO₂ glasses before irradiation with (a) 1.0 mol% (b) 2.0 mol% (c) 3.0 mol% of Ga₂O₃

Fig. 4.7 Raman spectra of SG-1 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.8 Raman spectra of SG-2 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.9 Raman spectra of SG-3 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 4.10 Optical absorption spectra of SrO–B₂O₃–SiO₂ glasses irradiated with different doses of gamma rays mixed with (a) 1.0 mol% (b) 2.0 mol% (c) 3.0 mol% of Ga₂O₃

Fig. 4.11 Emission spectra of SG-3 glass sample irradiated with different gamma ray dose

Fig. 4.12 ESR spectra of SG-3 glass sample irradiated with different gamma ray dose; the inset shows the SG-3 glass sample irradiated with different gamma ray dose in a smaller scale
Fig. 5.1 (a) XRD pattern of SI-3 glass sample before irradiation and (b) XRD pattern of SG-3 glass sample irradiated with 30 kGy dose

Fig. 5.2 Optical absorption spectra of SrO–B₂O₃–SiO₂ glasses irradiated with different doses of gamma rays mixed with (a) 1.0 mol% (b) 2.0 mol% (c) 3.0 mol% of In₂O₃

Fig. 5.3 Emission spectra of SI-3 glass sample irradiated with different gamma ray dose

Fig. 5.4 (a) ESR spectra of SI-3 glass sample irradiated with different gamma ray dose

(b) shows the SI-3 glass sample irradiated with different gamma ray dose in a smaller scale

Fig. 5.5 (a) FTIR spectra of SrO–B₂O₃–SiO₂ glasses before irradiation with (i) 1.0 mol% (ii) 2.0 mol% (iii) 3.0 mol% of In₂O₃

(b) FTIR spectra of SI-3 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 5.6 (a) Raman spectra of SrO–B₂O₃–SiO₂ glasses before irradiation with (a) 1.0 mol% (b) 2.0 mol% (c) 3.0 mol% of In₂O₃

(b) Raman spectra of SI-3 glass sample irradiated with different doses 1 kGy, 10 kGy, 30 kGy

Fig. 6.1 Optical absorption spectra of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses

Fig. 6.2 Urbach plots to evaluate Optical band gaps of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses

Fig. 6.3 ESR spectra of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses

Fig. 6.4 Photoluminescence spectra of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses

Fig. 6.5 FT–IR spectra of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses

Fig. 6.6 Raman spectra of MnO doped SrO–Al₂O₃–B₂O₃–SiO₂ glasses
