ACKNOWLEDGEMENTS

I am highly indebted to many persons for successful completion of my work, as completion of this profound research work was not possible without their significant contribution.

I have great pleasure in expressing my deep feelings of gratitude to my respected teacher and guide Dr. Pratibha B. Desai, Director, Shree Ramkrishna Institute of Computer Education and Applied Sciences, Surat, for her valuable guidance, encouragement, inspiration, keen supervision, constructive criticism and warmth. I am also very thankful to her for spending her valuable time in writing thesis. This work would never take this shape without her parental care and watchful help.

I also pay my sincere thanks to Dr. P. S. Desai, Director, Dolat Usha Institute of Applied Sciences and Dhiru Sarla Institute of Management & Commerce, Valsad, for his encouragement and providing necessary facilities to carry out this work.

I am very much thankful to Mrs. Reena Desai, Head, Department of Microbiology, Dolat Usha Institute of Applied Sciences and Dhiru Sarla Institute of Management & Commerce, Valsad, for her kind help and sisterly support.

I also express my profound thanks to Dr. Ratna Trivedi, Mr. Sanjay Parekh and Mr. Jay Bergi, Asst. Professors of Shree Ramkrishna Institute of Computer Education and Applied Sciences, Surat, for their kind help, encouragement and guidance.

I am also thankful to my colleagues cum friends Krishpa Shah, Urvashi Desai, Divya Desai, Neena Desai, Gira Desai, Rima Desai, Hema Varudkar and Roshni Thakkar for their intense help. I extend my special thanks to Prakashbhai, Navinbhai and Poonamben.

I would heartly like to thank Dr. Satyajit Ray, Dr. Kanti Patel, Dr. Kalpesh Joshi, Dr. Hetal Shah, Dr. Vishal Mehta, Dr. Kirit Ankleshwar, Dr. Dipak Kakade, Dr. R. K. Desai and Dr. Anis Diwanji for their kind co-operation and guidance regarding treatment and sample provision.

I would like to pay my sincere thanks to Ramanbhai, Jatinbhai, Swati, Jinal, Parul, Tabassum, Priya, Vishruti, Dhara, Ushma, Riddhima, Tanvi and Priyanka for their precious support.
I am also very thankful to all staff members of the Department of Microbiology of Shree Ramkrishna Institute of Computer Education and Applied Sciences, Surat, for extending their help and support.

Behind this humble achievement, there is a key role played by my family members. I heartily thank my mother Shardaben, Kalpanaben and father Naginbhai, Kantubhai for their great moral support. I am also highly thankful to my brothers and sisters Mitesh, Jagdishbhai, Parimalbhai, Poonam, Rashmiben and Tejal for their help and co-operation.

I want to thank all my friends, relatives and well wishers, for their love, support and sharing joys and troubles both during this work and everyday life.

At last, but not at the least I wish warm and heartily thank to my loving daughter Zeel and my husband Rakesh, who have share all my problems, provided moral support and help a lot in doing computer based work.

Finally I would like to thank those who helped directly or indirectly in this work. Last and foremost, I would like to show my appreciation to everyone who have assisted and supported me in any aspect during completion of this work and thesis.

Hetal K. Panchal
