ACKNOWLEDGMENTS

“Thank ALLAH for the wisdom and perseverance Almighty for giving me courage and support in order to accomplish the task of my Ph.D. Thesis”

Many people have helped me in various ways to ensure that this thesis come to fruition. My deepest thanks to all of them, and in particular:

I want to thank my thesis supervisor, Prof. Dr. Haridas S. Acharya. I am deeply grateful for his understanding, assistance, encouragement and positivity throughout the course of my PhD studies. Quite often, problems that I had been battling with for days got solved by simply talking to him. I have learnt valuable lessons from him both at the academic and personal levels. He has been a mentor and an inspiration to me. His sharp intellect and insight gave direction and deeply influenced my research. His immeasurable patience, attention to detail and critical feedback during the process of this thesis have made it into the form it is today. I could not have asked for a better supervisor.

I am deeply thankful for Prof. Abdullah Mohammed Baharoon, Vice-Chancellor of Al-Ahgaff University in Yemen, who first advised me to work in the field of Information Security. I am grateful and deeply indebted to the support provided by the Al-Ahgaff University – Hadhramaut in the first year of my doctoral research.

My research experience at the Symbiosis Institute of Computer Studies and Research at SIU University has been extremely enlightening, fulfilling and rewarding.

Next, I am indebted to Dr. Lahouari Ghouti at King Fahd University of Petroleum and Minerals –Saudi Arabia for his timely advice and significant guidance in Biometric Systems for developing the software to generate biometric templates, and for always sharing his information and experience from which I have learnt so much.

My gratitude to my Mother and brothers for emotional support; I am profoundly grateful for their love and sacrifice.
To my wife, without her continuous support and keen understanding, this PhD project would be much more difficult to complete. For her love, encouragement and patience, and simply for having her in my life, I am deeply grateful.
