List of Tables

Table 1  Biochemical characters of *Salmonella Typhi*

Table 2  Comparison of the performance of the various tests for typhoid

Table 3  Reaction Mixture for RAPD analysis

Table 4  The schedule of inoculating the O, H and Vi antigens in different white Leghorn

Table 5  Different Stock concentrations of *Swietenia mahagoni* methanol extract

Table 6  Preparation of working concentration of Potassium dichromate (µg/ml)

Table 7  Frequency distribution of *Salmonella Typhi* according to sex and details of age group below 10 yrs

Table 8  Age distribution of patient

Table 9  Source of samples

Table 10  Widal titer value

Table 11  Biotype -Sugar Fermentation and distribution details of isolates by sugar fermentation

Table 12  List of Antibiotics

Table 13  Antimicrobial susceptibility pattern of *Salmonella enterica serotype Typhi*

Table 14  Comparison of Karl Pearson’s Correlation Coefficient of Test with Control Peak intensities

Table 15  Comparison of Excluded variables of Test with Control Peak intensities

Table 16  Comparison of Mann Whitney U of Test with Control Peak intensities

Table 17  Thin layer agar diffusion assay using *Swietenia mahagoni* methanol leaf extract against *S. Typhi*

Table 18  Minimum inhibitory concentration of SM3 methanolic leaf extract against *S. Typhi*

Table 19  LC<sub>50</sub> for brine shrimp for SM3 methanolic extract (24 hrs)

Table 20  LC<sub>50</sub> for brine shrimp for SM3 methanolic extract (48 hrs)
