ACKNOWLEDGEMENT

This is the proper time to express my sincere thanks to all of them who led their unconditional support as well as guidance and assistance during my long period of research work.

First and foremost I offer my sincerest gratitude to my supervisor, Dr. Dibyendu Sarkar, who has supported me throughout my thesis with his patience and knowledge whilst allowing me the room to work in my own way. He always motivated me for hard work and better laboratory practices. I attribute the level of my PhD degree to his encouragement and effort and without him this thesis, too, would not have been completed or written.

I take this opportunity to thank and acknowledge Dr. Girish Sahni, present director, IMTECH for providing such an excellent research facility and research environment. It has been a great experience to be part of this institute.

There are few IMTECH scientists who monitored my work and provided valuable comments as and when needed, I would like to extend my sincere thanks to all of them. Especially I would like to thank our collaborators Drs. S. Karthikeyan and Bala and Balvinder Singh for their insightful suggestions and help in homology modeling and bioinformatics analysis.

I am highly thankful to Dr. P. Guptasarma and Mrs. Sharanjeet Kaur for CD experiments. I also extend my gratitude to Drs. Alok K. Mondal, and Mr. Deepak Bhatt for providing error free and reliable DNA sequencing facilities. I would also like to thank Dr. Girish Sahni and Mrs. Paramjit Kaur for helping me in N-terminal sequencing experiments. I am grateful to Dr. Shekhar Majumdar and his lab members for management and timely distribution of radioisotopes which was crucial for most of the experiments described. I also thank Dr. Grish Varshney, Dr. Ajit and surinder for their help in generation of anti-PhoP polyclonal antibodies.

I am also thankful to Dr. Pradeep Chakrabarti for efficiently coordinating the PhD program. I would like to acknowledge Drs. A.K. Bachawat, C.R. Suri, S. Kumaran and A. Ganguli and their lab members for being supportive and friendly lab neighbors.

I wish to thank the entire staff of animal house facility at IMTECH especially Dr. Neeraj Khatri and Mr. Bawa for animal immunization and antibody generation. Being our hostel warden, he also provided excellent hostel facilities during my stay in the campus.

The cooperation and help rendered by the entire IMTECH family, Bioinformatics center, Library, Instrumentation, Administration dept., Store and Purchase section as well as electrical and engineering dept. is deeply acknowledged.

During my time as a PhD student, I have been lucky enough to have been surrounded by wonderful colleagues. My lab buddies need a special mention as it is because of these people that my experience in IMTECH has been a pleasurable one. My senior colleagues Dr. Sankalp Gupta and Akesh Sinha deserve a special place in this acknowledgement for giving me the first hand training on many routine techniques of the lab and teaching me the details of experiment execution. I owe a lot to my junior colleagues Jesse, Arijit, Rajni and Ranjeet for many brainstorming sessions where we had discussions not only on science but on other spheres of life as well. Jesse was always a part of some unforgettable experiences and he has become one of my best friends during my PhD tenure. In form of great colleagues I also thank Renu Sharma for providing a fantastic technical assistance and efforts for smooth functioning of the lab.
The list would be incomplete if I forget to mention my batchmates. Excursion trips with Pankaj Chauhan, Santosh, yashpal, Mirage and Hardeep were instrumental in providing refreshment between long periods of lab work. Nitish, Dipanwita, Mahesh and Akhilesh, were always an integral part of mind boggling lunch time discussions. I am thankful to Ruchi, Anupriya, Mamoon, firoz, Sidarth, Monika, Soniya, Pankaj Arora, Hemant, vijender, Shiveta, Swati and Mohan for always cheering me up. I have nice friendships with some colleagues like Pallavi and Sonu. I am greatly indebted to all of them who made my stay pleasant at IMTECH. During tough initial days of my stay, love and affection I got from my seniors Drs. Ajit tiwari, Sanjeev, Narender, Murty, Kishor, Shilpy, Neha and Manish kumar will be difficult to express in words. I loved the cheerful support of many of my juniors like Vijaya, Ashish, Rahul, Vaibhav, Mary, Kalpana, Shikha, Yogendra, Appu, Anil, Amit yadav, Sandeep singh, Sandeep Dave, Vijay, Sandeep Kaur, Satindra, Monika, Yogesh, Vehmika, Kit and others. I thank them all for being so supportive and understanding. I am also thankful to Dr. Netrapal, Rahiman, Ziya, Satya, Sanjay, Pankaj, Aditya, Mirage and other for giving company in badminton court. One to one games of Table tennis with Mirage were quite competitive and exciting. Pankaj gave a nice company during Saturday dinners and while roaming around in the city beautiful. Early morning singing in hostel by Akhilesh will be unforgettable. I got a nice company in hostel with Bharat, Sanjay, Shailen and other juniors. I loved having small chats with Bharat during odd hours at hostel. Few of my lifelong friends like Sharad, Anshula and Navin always supported me during tough times. I am grateful to Dr. J. B. Singh and Mr. B. N. Bajpai for their care and support.

The financial assistance provided by CSIR throughout my research tenure is duly acknowledged. This work was supported in part by Council of Scientific and Industrial Research (CSIR) and by a research grant from Department of Biotechnology (DBT) and Department of Science and Technology (DST), Government of India.

Finally the time has arrived to show the sense of gratitude, love and affection I have towards my family. This work would have been impossible without the unconditional support of my family in almost everything I did right from my childhood. I am grateful to all my family members who in spite of being neglected from my side were always with me throughout this period. I wish to take this occasion to thank my elder brother Pradyumn, my Bhabhi Dr. Jyoti, and my nephew Tejas for their love and affection which always made me feel special. I feel a deep sense of gratitude for my father and mother who formed part of my vision and no words can express their contribution in shaping up my life and thoughts. I owe a lot to my parents and dedicate this thesis to them.

August 2010
