Acknowledgements

Today, as I approach the end of this long journey I would like to acknowledge all the people, without whose support this work would have been impossible and who knowingly or unknowingly became a part of this journey.

First and foremost I would thank my supervisor Dr. Subhra Chakraborty for all the guidance and support that she has given me, throughout my Ph.D tenure. I am grateful to her for the invaluable suggestions and encouragement which enabled me to complete this work.

I would also thank Dr. Niranjan Chakraborty for his moral support and advice at all the stages of the work.

I am grateful to the Founder director, NIPGR, Prof. Asis Datta, for giving me the opportunity to work in this institute. I thank him for being a constant source of inspiration and encouragement.

I acknowledge the goodwill, care and advice of Prof. Kasturi Datta, School of environmental sciences, JNU.

I would like to thank all the scientists of NIPGR, Dr. Sudip Chattopadhyay, Dr. Debasis Chattopadhyay, Dr. Sabhnyata Bhatia, Dr. Praveen Verma, Dr. Alok Sinha, Dr. Manoj Prasad, Dr. Manoj Majee, Dr. Naveen Bisht, Dr. Ashwarya lakshmi, Dr. Geetanjali Yadav, Dr. Mukesh Jain and late Dr. Jayanti Sen for being always helpful. I also thank Prof. Sushil Kumar for his support.

I am thankful to Prof. Natrajan, School of life sciences, JNU for his advice, whenever I needed.

I express my deep gratitude to all my teachers in BSc, MSc and M.phil for creating interest in Science. I am grateful to my M.phil guide Prof. Indranil Dasgupta, South Campus, Delhi University for developing my inclination towards research.

I acknowledge the goodwill and care shown by all my seniors Sharmishthadi, Praveenda, Bhaskarada, Iyotida, Suneetada, kajaldia, Manjishthadi, Deepali, Dr. Archana and specially Monideepadi, Shamikad and Arnabadia who had made the lab a comfortable place to work. I thank my MSc friend Leela for patiently hearing my problems during the tenure. Thanks to Sarjeetda and Uma madam for their help always.

I thank my all my labmates and juniors for constant help and support at all stages of the work, Deepti, Swagata, Vijay Mele, lalita, Kishwer, Ajay, Mohan, Vijay Nalla, Hanumant, Dinesh, Aarti, Pratigya, Sonika, Vijay wardhan, Protiti, Sumit, raghu, Vinay, Gaurav, Anil, Pyniar, Deepa, Ayushi, Anand, Shubendu, Sagar, Jitendra, Sushmita, Sudip, Maninder and Kanika. Thanks to Debarati for helping me at the last stage of the work.

I am thankful to my friend and labmate Pranjan for all the experimental help as both of us were sailing in the same boat.

I can never forget the contributions made by Rajul and Naval at the last and the most crucial step of this work, Rajul, willingly with a ever smiling face always helped without which the work could never have taken this shape. I thank him for going through my voluminous references in the thesis again and again.

A very special thanks to Nagu, Navsheen, Rajgourab and Manikant in editing my thesis and helping me work out experimental problems at different stages of the work.

Thanks to all my friends in the institute who have helped me whenever I needed, especially Bhumika, Snehashru, Manishadi, Sarita and Parul.

I am grateful to Jasbeer ji, for his help during my thesis writing. I thank Aurobindo da, Bishu da, Mahinder ji, Ajay ji, Neeta ji, Sujoy da and Brijeshji.

A special thanks goes to Rajbeer ji, Ravi, Shankar, Anand ji for their help and support in helping me to complete my experiments in time. I also express my gratitude to Arunji for sequencing and the CIF staff Ashokji, Shobharamji and Surendraji.
Thanks are also due to the NIPGR office staff who always cooperated with me in solving out all the issues.

I acknowledge the financial support I received from DBT, DST and later from the institute. Now comes the most important aspect of my life that is my family, who stood by me as a pillar in this most critical period of my life. As I had started Ph.D after my marriage, I express my regards for my parent-in-laws who have stretched out all means to help me in every way, they could. I stepped in this lab for the first time with my father-in-law, his concern and support gave me enormous strength all along. My mom-in-laws love care and affection helped me to resolve all issues in and outside lab. Her prayers day in and day out didn’t go unsaid. My brother Babu, and brother-in-law Raja supported me in every way they could although they were struggling in their work. My son, Bibhu was used to my erratic schedule since he was in womb. His mischievous activities and involvement in everything, distressed me after the whole days hectic schedule.

Whatever I could achieve till day is because of my parents. My guide, my father, being a professor himself influenced me since childhood. Seeing him involved in research, all throughout I developed interest in this field. There were times when I had completely lost faith in myself, but my mother had full confidence in me. Her tremendous mental strength and optimism helped me to sail through. I wish my thanna, dadu(paternal grandparents) and my dadubhai(maternal grandfather) were there with me today. My thanna always believed that I could do the impossible. My dadubhai(maternal grandma) at the age of ninety is always praying for me which gave me mental relief all throughout. Thanks to all my relatives and relative in laws for their goodwill and encouragement.

I am indebted to my better half, Suvesh for all the sacrifices he made to fulfill my dream. In spite of having a stressed corporate environment, he always stood by me whenever I needed.

Above all I thank the almighty for everything I got.

(ma aachen aar aami achari, bhabnakke aar ache aamar..................)
