Acknowledgement

Looking back five years since I came to NIPGR, what an amazing journey it has been for me! Encompassing both good times that I will remember forever because it were aplenty, and not-so-good times yet I didn’t sway from my conscience, this assiduous hike wouldn’t have accomplished without tremendous help and support I gratefully received from many individuals as highlighted below. I would like to thank all people who have helped and inspired me during my doctoral study.

I especially want to thank my advisor, Dr. Manoj Prasad, for his guidance during my research and study at NIPGR. His perpetual energy and enthusiasm in research had motivated all his advisees, including me. In addition, he was always accessible and willing to help his students with their research. As a result, research life became smooth and rewarding for me.

I was delighted to interact with Dr. Debasis Chattopadhyay by having him as my co-advisor, whose thoughtful advice often served to give me a sense of direction during my PhD studies. I also like to express my gratitude to Dr. Suprio Chakraborty as member of my Ph.D. advisory committee for his valuable advice and friendly help. I would also like to thank Dr. Sudip chattopadhyay, Dr. Alok Krishna Sinha, Dr. Pravin Verma and other faculty staff of NIPGR for their valuable advice and support.

Prof. Asis Datta, former director of NIPGR and Prof. Akhilesh Kumar Tyagi, director of NIPGR have always been a constant source of encouragement during my doctoral study. Besides, they have set a role model who cares and loves their students as if they were their own kids. Thanks Prof. Asis Datta and Prof. Akhilesh Kumar Tyagi for providing me such a workplace.

I wish to thank all the staff members of NIPGR specially Mr. Sandip Datta, Mr. Sudhir Patwal, Mr. Tapas, Ms. Rajani and Ms. Vineeta for their kind and helpful nature in fulfilling office formalities. I would also like to thank the CIF staffs Ashok ji, Shobharam ji, Surendra ji and Arun ji for helping me at different stages of work.

All my lab buddies at the NIPGR Laboratory made it a convivial place to work. All other folks, including technical and non-technical staff, had inspired me in research and life through our interactions during the long hours in the lab. Thanks. I would also like to thank Mr. Ravi who has helped me a lot in raising plants in field and green house.

The good advice, support and friendship of, Dhammayrakash Wankhede, has been
invaluable on both an academic and a personal level, for which I am extremely grateful. I would also like to thank my friends Rajiv Yadav, Kunal singh and my seniors Sri Ram sir, Babu sir, Prabhakar sir and Monika mam. I am tempted to individually thank all of my friends who, from my childhood until NIPGR, have joined me in the discovery of what is life about and how to make the best of it. However, because the list might be too long and by fear of leaving someone out, I will simply say thank you very much to you all.

I would like to acknowledge the financial, academic and technical support of the National Institute of Plant Genome Research, New Delhi and its staff. The CIF facilities, library facilities and computer facilities of the Institute have been indispensable. This thesis was financially supported by scholarship and contingencies from Council of Scientific & Industrial Research (CSIR), India for which I am very thankful.

My deepest gratitude goes to my family for their unflagging love and support throughout my life; this dissertation is simply impossible without them. I am indebted to my father, Shri Girish Chandra Rai, for his care and love. As a typical father in an Indian family, he worked industriously to support the family and spare no effort to provide the best possible environment for me to grow up and attend school. He had never complained in spite of all the hardships in his life. I cannot ask for more from my mother, Smt. Nirmala Rai, as she is simply perfect. I have no suitable word that can fully describe her everlasting love to me. I remember her constant support when I encountered difficulties and I remember, most of all, her delicious dishes. Mother, I love you. I feel proud of my sisters, Boski and Sweta by my side through the most difficult times of this journey, accomplishment wouldn’t have been half sweet.

I owe my loving thanks to my wife Archana Neeraj Rai, my daughter Ananya N. Rai (Jhumki). They have lost a lot due to my research away from home. Without their encouragement and understanding it would have been impossible for me to finish this work.

Last but not least, thanks to God for my life through all tests in the past five years. You have made my life more bountiful. May your name be exalted, honored, and glorified.

Neeraj Kumar Rai
