ACKNOWLEDGEMENTS

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is the result of more than four years of work, whereby I have been accompanied and supported by many people. It is a pleasant aspect that I have now the opportunity to express my gratitude for all of them.

I bow my head before Almighty, the omnipotent, the omnipresent, the merciful, the most gracious, the compassionate, who is the entire and only source of every knowledge and wisdom endowed to mankind and who blessed me with the ability to do this work.

Foremost, I would like to take this opportunity to convey my cordial gratitude and appreciation to my Supervisor Prof. S.B. Sharma, Department of Biochemistry, University College of Medical Sciences for the continuous support of my Ph.D. study and research, for her motivation, enthusiasm and immense knowledge, without whose constant help, deep interest and vigilant guidance, the completion of this thesis was not possible. I am really grateful to her for providing me all the facilities regarding this research work and thankful to her for her accommodative attitude, thought provoking guidance, immense intellectual input and sympathetic behavior. I could not have imagined having a better advisor and mentor for my Ph.D. study.

I feel deep sense of respect to my Co-supervisor's Prof. S Dwivedi, former Head, Department of medicine & preventive cardiology, University College of Medical Sciences, and Prof. UR Singh, Department of pathology, University College of medical sciences for providing their intellectual feedback & extraordinary support at every step of my research. Thank you does not seem sufficient but it is said with appreciation and respect.

A special word of thanks to Dr. Sayeed Ahmad, Assistant professor, Department of Pharmacognosy and Phytochemistry, Jamia Hamdard for unconditional support in identification of plant materials and providing TLC & HPTLC facilities.

I am thankful to all teaching and nonteaching staff of the Department of Biochemistry, UCMS for their love and support. Co-operation and support given by administrative staff of Research cell, Department of Biostatistics and Animal house of the UCMS is highly appreciated. I am thankful to Dr. Shreesh Ojha for their continuous support, without his support, it was not possible to conceive the idea of this study. A special thanks to Dr. Satyesh Sinha & Dr. Manish Mishra for their motivation during the hard time.

I am thankful to my colleagues and friends namely Reenu, Richa, Asha, Piyush, Kirtikar, Azaz, Aslam and Aiman. They were always besides me whenever I needed them.
I cannot forget the help of my friends in NIHFW Ankur, Archana and Himani for their wonderful co-operation for western blotting. I am thankful to Rakesh and Mahipal for their contribution in animal handling and maintenance during my research.

I am immensely grateful to all those who directly or indirectly have contributed for the successful completion of my work.

I am grateful to Central Council for Research in Ayurveda and Siddha (CCRAS), Department of AYUSH, Govt. of India for providing the financial assistance to carry out this research work. I am also grateful to Indian Council of Medical Research (ICMR) for providing me Senior Research Fellowship. A special thanks to Department of Science & Technology (DST) for providing me the International travel grant to attend the conference in Los Angeles, USA.

Last but not least, I really acknowledge and offer my heartiest gratitude & finally, I express my deepest owe to my Father, Mother, Bhaiya, Bhabhi, my sisters and brother in laws, my younger brother Shivam and other family members for their extraordinary love, grace and providing constant encouragement and strength. The blessings & supports from elders & all other well wishers have always motivated me and boosted my morale.

A very special word of thanks & love to my wife Sushma for her immense support and encouragement in every step of my thesis. I would like to thank her for love, patience and understanding, which allowed me to spend most of the time on this thesis. I also would like to thank to my daughter, my beloved angel ‘Aditi’ who joined us, when I was in the midway of the journey of my thesis, for giving me unlimited happiness and pleasure. I am deeply sorry for the time we spent apart. Their huge sacrifice, because a long time they spent without me, so that I can focus more & more on my study & to enabled me to achieve this excellent goal.

I doubt that I will ever be able to convey my appreciation fully, but I owe her my eternal gratitude.

Acknowledgment would be incomplete without a tribute to the animals for their selfless and invaluable contribution to success of this study.

Place: Delhi
