ACKNOWLEDGMENTS

I would like to thank …….

“This THESIS would never have been written if it had not been for the encouragement, support, love, faith and assistance I received from a large number of people.”

I would like to express my gratitude to my supervisor, Dr. C.P. Baveja, Director Professor, Department of Microbiology, Maulana Azad Medical College & Associated Hospitals, whose expertise, understanding, and patience, added considerably to my research experience. I have no word to express for his assistance in writing reports (i.e., grant proposals, scholarship applications and the thesis), which have on occasion made me "GREEN" with envy. It was under his tutelage that I developed a focus and became interested in my life and for my thesis. It was though his, persistence, understanding and kindness that I completed my work.

I am fortunate and privileged enough to be having the opportunity to work under the co-supervision of Dr. Vinay Kamal, Director Professor, Department of Pathology, Maulana Azad Medical College & Associated Hospitals, very special thanks goes out to him, without whose motivation and encouragement, I would not have considered career in research. He is the one professor/teacher who truly made a difference in my life. He provided me with direction, technical support and became more of a mentor and friend, than a professor. I doubt that I will ever be able to convey my appreciation fully, but I owe him my eternal gratitude.

I am very grateful and indebted to acknowledge my co-supervisor Dr. P.N. Agarwal, Director Professor and Head, Department of Surgery; Maulana Azad Medical College & Associated Hospitals for his firm belief that a better way can always be found has influenced my approach to this research, as well as to daily life. His advice and suggestions on interpreting the case study
results and productive comments on an earlier draft directly contributed in
evaluation and in completion of this study.

I am also very grateful and thankful to Dr. Rajdeep Associate professor,
Department of Surgery for his valuable time and conversation during my OPD time.

I would also like to give my gratitude to Dr. Beena Uppal, Director
Professor and Head of Department, Department of Microbiology, for her
consistent encouragement, help, support and blessings.

I would also like to give my gratitude to Dr. Preena Bhalla Director Professor,
Department of Microbiology, for her consistent presence, encouragement,
support and blessings.

I am also very grateful and thankful to Dr. Sunil Gupta, Additional
Director, Department of Microbiology, NCDC, for his valuable time, support
and conversation during my work.

I am also very grateful and thankful to Dr. Jugal Kishore, Professor,
Department of Community Medicine, for his valuable time, presences, support
and helped me to completely understand statistical analysis of my thesis.

Thanks also goes out to all the Senior and Junior residents of Department of
Pathology and Surgery, for the help they provided me in the collection and selection
of the patients and their samples, without which my work would have been
meaningless. I want to thank specially Dr. Arun jha and Dr. Ompal singh of
Department of Microbiology, for their invaluable help and support.

I would also like to thank Dr. Vidya nidhi an inspirational backbone, my
seniors and all the research scholars cum friends: Ritu, Gaurav, Mayank, Indu,
Megh, Vivek, Naushad, Manash, Phani, Rajesh, Vijay and Suman of Maulana
Azad Medical College & Associated Hospitals for their philosophical debates,
exchanges of knowledge, skills, and venting of frustration during my Ph.D.
program, which helped enrich the experience and for the time we shared in the room, while discussions, and minor victories.

*Thank you for a great time!*  

Appreciation also goes out for all the technicians of Departments of Microbiology especially to Tongtang Join Rita technician TB Lab, Pathology and to nurses and staff of Department of Surgery for their technical Support and technical assistance throughout my Ph.D. program, and especially to the office staff of Department Microbiology for all the instances in which their assistance helped me along the way. Last but not least, I want to thank my cousin brothers, sisters and dear ones for the support they provided me through my entire life and in particular, I must acknowledge my friends, Mokkarram, Rajiv, Atul, Vishal, Nidhi, Mahesh, Arpita without whose presence, love, encouragement, moral support and editing assistance, I would not have finished this thesis.

I want to thank especially my **PARENTS, BROTHER AND MY GRAND MOTHER .....** Thank you for your conversations over dinners and your wonderful company, the encouragement and the care when things looked too difficult to do. This work would not have reached its present shape without your inspiration and blessings. Thanks for your understanding..... Your belief and generosity are most profoundly acknowledged here, in black and white, with love and respect.

I am also grateful to all the patients included in this study without whom the thesis would not have been possible.

In conclusion, I recognize that this research would not have been possible without the financial assistance of ICMR and express my gratitude and I will always be thank full to Indian Council of Medical research (ICMR).

**HIMANSHU JHA**
