ACKNOWLEDGMENTS

It would not have been possible to write this doctoral thesis without the help and support of several individuals who in one way or another contributed and extended their valuable assistance in the preparation and completion of this study. Above all, I would like to thank my supervisor Dr. Parbati Biswas. This work would not have been possible without her guidance, support and encouragement. Under her guidance I successfully overcame many difficulties and learned a lot. I count myself lucky for getting a guide like her. Besides being a great guide Dr. Biswas is also a great human being and showed me that one can do good scientific research without losing touch with one’s humanity. Thank You Ma’am for everything.

My colleagues in my lab who provided a stimulating and fun filled environment have been the most important part of my journey in this research. My seniors, Dr. Arnab Bhattacharjee and Dr. Nicholus Bhattacharjee were there when I first entered in my lab. Both of them encouraged me in every possible way to learn and start my thesis work. Arnab bhaiya is a highly research oriented person and I had learned a lot from him. He has always motivated me to be better and to do better in my research. He helped me to learn computational skills, in preparing presentations and was always there whenever I faced problems. Nicholus bhaiya is very hardworking and his sincerity and passion for research is undoubtedly of highest level. He always gave constructive ideas to improve my research. Amit, Anupaul, Pooja and Gobind joined the lab after me and these are the people who had helped me a lot in compiling this thesis. Amit is a very lively person who is highly methodical in his research. He is highly supportive and his ready to help attitude
in every possible way distinguishes him from others. **Anupaul** is levelheaded with highest degree of patience which makes him the coolest person of our lab. He is always eager to help and his creative suggestions improved my work. **Pooja** is very energetic and always ready to learn and help. She is very sincere and with her enthusiasm for the research and hard work she will achieve all her goals. Discussions with her had helped me to solve the problems whenever I was struck during my research work. **Gobind** is intelligent and hard working and has started his research work with full enthusiasm. He also had helped, appreciated and encouraged me to improve my research.

I thank my Ph.D. advisory committee members, **Prof. Rama Kant** and **Dr. M. Thirumal** for their helpful suggestions and comments during my progress report presentations. Prof. Kant with his profound knowledge provided the interesting insights which helped me to improve my research work. I would also like to convey my sincere gratitude to Dr. Thirumal for his helpful career advice and suggestions in general.

I feel myself lucky enough to interact with some bright research scholars from Prof. Kant’s lab, Dr. Shailendra Kumar Jha, Dr. Rajesh Kumar, Birla, Merajul, Shruti and Parveen for both academic and non-academic reasons. I would also like to thank my hostel mates, Surya, Manini and Archana for their companionship.

I acknowledge **Bioinformatics Resources and Application Facility** (BRAF) of Centre for Development of Advanced Computing (CDAC), India for providing computational facility in Biogene cluster. I also gratefully acknowledge **Council of Scientific and Industrial Research, India** for their financial support which made my Ph. D. work possible without the tension of earning my living.

And last, but definitely not the least, my family and friends. My **Mummy**
and Papa have supported me in every aspect of my life and have always encouraged me to perform well. They have faith in me and this has always motivated me to work hard. My uncle, Mr. Vijay Rawat is the person with whom I can share anything and he always understand and encourages me to perform better. My sweet brother, Nisheeth is very excited that his sister is finally submitting her thesis. I would also like to thank my grandparents, uncles, aunts and cousins for their love and support. Inderjeet di and Monika di, thank you for helping me and supporting me.

Ph.D. helped me to grow as a person both academically and non-academically. The last five years, spent in my Ph.D. work were the most exciting and memorable period and I will cherish them throughout my life.
