LIST OF TABLES

TABLE

1 Two-way Analysis of Variance for the Data on Internal Attribution 102

2 Ordered Internal Attribution Means and Differences between the Means for Different Age group. 104

3 Internal Attribution Means and Differences between the Means of Performance outcome group. 105

4 Two-way Analysis of Variance for the Data on External Attribution. 106

5 Ordered External Attribution Means and Differences between the Means of Performance outcome group. 108

6 Two-way Analysis of variance for the Data on Ability Dimensions of causal attribution. 109

7 Ordered Ability Dimension Means and Differences between the Means at Different age level group. 111

(xii)
Ordered Ability Dimension Means and Difference between the Means of Performance outcome group.

Post-hoc Analysis of Interaction of Ability Dimensions.

Two-way Analysis of Variance for the Data on Effort Dimension of Causal Attribution.

Ordered Effort Dimension Means and Differences between the Means of Performance outcome group.

Two-way Analysis of Variance for the Data on Task-Difficulty Dimension of Causal Attribution.

Task-Difficulty Dimension Means and Differences between the Means of Performance outcome group.

Post-hoc Analysis of Interaction of Task-Difficulty Dimension.

Two-way analysis of Variance for the Data on Luck Dimension of Causal Attribution.
Ordered Luck Dimension Means and Differences between the Means for Different Age group.

Luck Dimension Means and Differences between the Means of Performance outcome group.

Significance of Mean Differences in External Attribution Between Pre-test and Post-test scores of the subjects following training.

Significance of Mean Differences in Internal Attribution between Pre-test and Post-Test Scores of the Subjects following Training.

Significance of Mean Differences Between Pre-Test and Post-Test Scores of The Training Group in Different Dimensions of Causal Attribution.
