List of Tables

Table 1: Summary of Researches on Models and Simulations in Science Education .......... 53

Table 2 - Details of Sample Schools ................................................................................. 78

Table 3 - Details of participant teachers ............................................................................. 79

Table 4 - Average scores of different teachers on the feedback schedule ......................... 96

Table 5 - Properties of undefined variables in Table 4 ...................................................... 97

Table 6 - Range and Mean of average scores on Feedback schedule ............................... 99

Table 7 - Descriptive Statistics of average scores on Feedback schedule ......................... 99

Table 8 - Item-wise Analysis of Teachers' Self-Assessment ................................................. 100

Table 9 - Details of emerging topics/areas along with teachers and learners on possible sites of alternatives frameworks .............................................................................. 129

Table 10 - Analysis of questions asked related to the topic/area ‘Air’ ................................. 131

Table 11 - Analysis of questions asked related to the topic/area 'Blood' ............................. 132

Table 12 - Analysis of questions asked related to the topic/area ‘Cell’ .............................. 133

Table 13 - Analysis of questions asked related to the topic/area ‘Electric current’ .......... 136

Table 14 - Analysis of questions asked related to the topic/area ‘Force’ ............................ 139

Table 15 - Analysis of questions asked related to the topic/area ‘Light’ ............................. 141

Table 16 - Analysis of questions asked related to the topic/area ‘Magnets’ ...................... 143

Table 17 - Analysis of questions asked related to the topic/area ‘Mirror and Lenses’ ........ 145

Table 18 - Analysis of questions asked related to the topic/area ‘Plant Reproduction’ ...... 146

Table 19 - Analysis of questions asked related to the topic/area ‘Rain’ ............................. 147

Table 20 - Analysis of questions asked related to the topic/area ‘Soil’ .............................. 148
Table 21 - Analysis of questions asked related to the topic/area ‘Transparency of objects’ 150

Table 22 - Analysis of questions asked related to the topic/area ‘Universe’ .......................151

Table 23 - Analysis of the characteristic of Computer Assisted Learning perceived by science teachers ........................................................................................................................................171

Table 24 - Evaluation of Computer Assisted Learning program ..............................................188
List of Figures

Figure 1- Classification of Different Schools Constituting School Sample .......................... 77

Figure 2 - Classification of teachers’ sample ........................................................................ 81

Figure 3 - Classification of science learners .......................................................................... 82

Figure 4 - Graph showing the average scores (ungrouped) of science teachers on the feedback schedule ......................................................................................................................................... 98

Figure 5 - Graph showing grouped description of average scores on the feedback schedule.. 99

Figure 6 - Individual average score of different respondents on the item 'could locate the Alternative Frameworks amongst learners'.................................................................................................................. 101

Figure 7 - Grouped average score of different respondents on the item 'could locate the Alternative Frameworks amongst learners'.............................................................................................................................. 101

Figure 8 - Individual average score of different respondents on the item 'Was tolerant to individual interpretations by the learners'.................................................................................................................. 103

Figure 9 - Grouped average score of different respondents on the item 'Was tolerant to individual interpretations by the learners'.............................................................................................................................. 103

Figure 10 - Individual average score of different respondents on the item 'Could address the Alternative Frameworks amongst learners'............................................................................................................. 105

Figure 11 - Grouped average score of different respondents on the item 'Could address the Alternative Frameworks amongst learners'............................................................................................................. 105

Figure 12 - Individual average score of different respondents on the item 'Posted interpretative questions to the learners'.......................................................................................................................... 107

Figure 13 - Grouped average score of different respondents on the item 'Posted interpretative questions to the learners'.......................................................................................................................... 107

Figure 14 - Individual average score of different respondents on the item 'Could come out of the preconceived notion of expected answer'.................................................................................................. 109
Figure 15 - Grouped average score of different respondents on the item ‘Could come out of the preconceived notion of expected answer’ ................................................................. 109

Figure 16 - Individual average score of different respondents on the item ‘Withheld own ideas and conclusions effectively’ ........................................................................... 111

Figure 17 - Grouped average score of different respondents on the item ‘Withheld own ideas and conclusions effectively’ ........................................................................... 111

Figure 18 - Individual average score of different respondents on the item ‘Assisted learners to reflect on their own learning’ ........................................................................... 113

Figure 19 - Grouped average score of different respondents on the item ‘Assisted learners to reflect on their own learning’ ........................................................................... 113

Figure 20 - Individual average score of different respondents on the item ‘Could focus on individual explorations by the learner’ ................................................................. 115

Figure 21 - Grouped average score of different respondents on the item ‘Could focus on individual explorations by the learner’ ................................................................. 115

Figure 22 - Individual average score of different respondents on the item ‘Encouraged learners to generate explanations, arguments and models’ ........................................... 117

Figure 23 - Grouped average score of different respondents on the item ‘Encouraged learners to generate explanations, arguments and models’ ........................................... 117

Figure 24 - Individual average score of different respondents on the item ‘Tried to analyse learners’ reactions and responses’ ........................................................................ 119

Figure 25 - Grouped average score of different respondents on the item ‘Tried to analyse learners’ reactions and responses’ ........................................................................ 119

Figure 26 - Individual average score of different respondents on the item ‘Encouraged learners attempt to generate solutions to problems’ ................................................... 121

Figure 27 - Grouped average score of different respondents on the item ‘Encouraged learners attempt to generate solutions to problems’ ................................................... 121
Figure 28 - Individual average score of different respondents on the item ‘Contextualised teaching-learning process as per learners’ needs’ ................................................................. 123

Figure 29 - Grouped average score of different respondents on the item ‘Contextualised teaching-learning process as per learners’ needs’ ................................................................. 123

Figure 30 - Individual average score of different respondents on the item ‘Tested the pre-concepts of the learners’ ................................................................. 125

Figure 31 - Grouped average score of different respondents on the item ‘Tested the pre-concepts of the learners’ ................................................................. 125

Figure 32 - Individual average score of different respondents on the item ‘Modified the language as per learners’ need’ ................................................................. 127

Figure 33 - Grouped average score of different respondents on the item ‘Modified the language as per learners’ need’ ................................................................. 127
