ACKNOWLEDGEMENT

Pursuing a Ph.D project is just like climbing a high peak, step by step, accompanied with hardships, encouragement, trust and kind help from many individuals. When myself at the top of enjoying the success, I realize that it was, in fact, teamwork that help me to attain this goal. In all these years many persons were instrumental directly or indirectly in shaping up my research career. It was hardly possible for me to thrive in my doctoral work without the precious support of these personalities. Feeling of thankfulness is beyond the words. It is just an attempt to express due heartfelt feeling of gratitude at this juncture. It is with deep sense of gratitude that wishes to record the generous contribution of others who were no less involved than me.

At the outset, I would like to take this opportunity to thank my supervisor and guide Dr. Sharad Wakode, Associate Professor, DIPSAR for his encouragement, inspiration and guidance throughout the tenure of my research. He always provided incessant inspiration, priceless and prudent guidance, much needed constructive criticism, encouragement, persistent help and above all his upbeat approach towards my abilities made the achievement of this goal, a learning, rewarding and enlivening experience.

I express my special thanks to Prof. (Dr.) B. P. Srinivasan, Director, DIPSAR, Head, Department of Pharmacy, University of Delhi for providing me with excellent infrastructure facilities and to utilize my strong conviction and devotion by channelizing my potentials and enthusiasm effectively.
I am deeply indebted and express deep sense of gratitude to Prof. (Dr.) S. S. Agarwal, Pro Vice Chancellor, Amity University for giving me a chance to excel my professional skills and abilities in stimulating and challenging environment.

I wish to express my gratitude and special thanks to Dr. B. Narasimhahan, MDU University for his hand on expertise in performing QSAR studies.

I express my sincere thanks to Dr. S. K. Gupta and Dr. D. P. Pathak for their valuable and informative suggestions. I am also thankful to Dr. Rajani Mathur and Dr. Meenakshi Chauhan for their valuable suggestions and discussions, which motivated me to think about the topic in various aspects.

I wish to express my sincere thanks to Director NIPER, Mohali and IIT, New Delhi for providing ^1H NMR, and Punjab University for providing Mass Facility and Delhi University for carrying out Elemental Analysis and Arbro Pharmaceuticals for helping in IR analysis.

I express my special thanks to my friend Supriya Agnihotri for her continuous support, untired efforts, valuable suggestions, constructive criticisms and continuous discussions throughout my research work.

And my thanks is due to Ms. Vidushi Sharma for her valuable contribution in the completion of this thesis.

Words cannot fully express in appreciation to the contribution of my colleagues and friends for their moral support, constant encouragement and help in every phase of my work.
I am also thankful to laboratory technicians, library staff and central store staff for their help. I take this opportunity to thank all my friends and colleagues as well.

All that I have achieved so far in life would not have been possible without the guidance and support of my parents and in-laws. I owe my deepest sense of gratitude and respect for them. Their timely support and dedication motivated me in positive direction to accomplish my goals. A very special thanks to my brother Abin Jacob who has been the driving force for me in joining and completing my research work.

I wish to give thanks to my husband Mr. Bejoy M Pappachan for his understanding and support for the completion of this degree.

Lastly, I would like to thank all those who in whatsoever extent contributed their bit in the completion of this thesis.

Jemi Jacob
