ACKNOWLEDGEMENT

If I would have had to articulate the constant, tireless and invaluable support of my Ph. D supervisors, Dr. Veenu Seth and Dr. Kalyani Singh; Associate Professors, Department of Food and Nutrition, Lady Irwin College, New Delhi, I would always falter owing to the lack of words. Their affable countenance and encouraging words at all right times pushed me to strive to do better than the previous day. This work is a part of my heartfelt gratitude to them without whose meticulous involvement it wouldn’t have taken its final shape. God’s choicest blessing to me!

Sincere gratitude to Dr. Anupa Siddhu, Director, Head of the Department, Department of Home Science, University of Delhi. Her experiential suggestions added much needed substance to my work.

A special note of thanks to my advisors, Dr. Salila Thomas, Associate Professors, Department of Food and Nutrition, Lady Irwin College, New Delhi and Dr. Alka Mohan Chutani, Chief Dietitian, AIIMS, New Delhi. Their thoughtful advices and novel ideas were helpful.

My heartfelt thanks to Dr. Farooq Masoodi, Head of the Department, Department of Food Technology, University of Kashmir, Srinagar for his support and back-up in pursuing my microbiological work in the Laboratory of Food Technology which was an indispensable part of my study. Alongside, I gratefully thank Dr. Yaqub Sheikh, Assistant Professor, Department of Food Technology for his constant guidance during the entire microbiological laboratory work.

I am thankful to Dr. Asha Sarabhoy, Former Faculty in the Department of Food & Nutrition, Lady Irwin College. I owe her my heartfelt appreciation for the precious time and guidance during the period of writing the microbiological results.

As an expert in statistics, Mrs. Jharna Das added credibility to my thesis by framing out statistical analysis of this study. I will deeply remain obliged to her.

I thank Dr. Sarita Jain, Librarian, Lady Irwin College for availing me the requisite library facilities whenever needed.

I would like to acknowledge Centre of Advance Studies, University Grants Commission for the Fellowship provided to me during the course of this study. Thanks to Dr. Sushma Palmer for her recommendation in providing me the scholarship (Dr. Sushma Palmer Scholarship).
My abundant thanks to the Faculty members of Department of Food and Nutrition Lady Irwin College for their expertise which I most needed.

And to the entire staff of laboratories, Department of Food and Nutrition, Lady Irwin College and Department of Food Technology, University of Kashmir for their generous support.

A special thanks to Dr. Manisha Sabarwal, Assistant Professor, Department of Food and Nutrition, Lady Irwin College for her guidance in explicating anthropometric techniques.

The gentleness and amicability together with the proficient suggestions of Dr. D. P. S. Seth from time to time during the varied course of my work have been a treasure. Providentially!

I am grateful to Mr. Ramesh Menon, Faculty at Sri Aurobindo Society of Arts and Communication for his guidance during the creative writing workshop which help me during thesis-writing.

I thank the Directorate of Health Service officials of Srinagar for participating in my work and allowing me to collect data from the hospitals which has been the backbone of my entire work. I am also thankful to everybody I worked with during data collection, particularly the administrators, doctors, nurses, dietitians, food service employees and patients of hospitals in Srinagar.

I would not have contemplated this success in the final stretch of my work without the love, care and support of my siblings Maria, Hooria and Hannan and my fiancée, Raashid. Their countless ways of merry making and light humour whisked off my end-of-the-day weariness. To you all I shall remain thankful.

I would like to thank my special friends Farida Hassanali, Rhituparna, Manpreet, Garima, Sameen and Palak for their encouraging words, valuable suggestions and moral support from time to time.

Counting all the blessings I was bestowed with during the entire period of my work I thank Almighty Allah. Glory be to Him.
