ACKNOWLEDGEMENT

One feels proud when dream comes true, whatever be the costs. I am also feeling very happy on the occasion of my Doctoral research work seeing light of the day. I must acknowledge my gratitude to those who contributed directly or indirectly to this humble effort.

First and foremost, I wish to express my gratitude and sincere thanks to Prof. Jean Drèze and Prof. Indrani Gupta whose incessant support and guidance motivated me to pursue this research. Also, I consider myself fortunate to have a short discussion with Late Prof. P. N. Mari Bhat, then the Director of IIPS, regarding methodology of my thesis.

I am extremely thankful to my thesis advisor Prof. Jayati Ghosh who helped me a lot to fine tune my research from time to time. She always gave me a direction when I was stuck and did not know what to do ahead. In the last three years of academic association with her, she motivated and supported me continuously to write research papers for academic journals. She took much pain to go through my write-ups throughout this period. Her continuous guidance through the entire process of this research contributed a lot to wrap it up well ahead of time.

I must acknowledge here the kind help of Prof. Sulabha Parasuraman (IIPS), Prof. Arup Mitra (IEG), Dr. Lekha Chakraborty (NIPFP), Prof. K. R. Nayar (JNU), Prof. P. M. Kulkarni (JNU), Prof. Amitabh Kundu (JNU), Prof. Saraswati Raju (JNU), Prof. Amaresh Dubey (JNU), Prof. Manoranjan Pal (ISI, Kolkata) and Dr. Abhiroop Mukhopadhyay (ISI, Delhi). I feel myself privileged to have unconditional academic help from them when I needed it badly. They helped me even without any prior appointment within their busy schedule. The kind of support ranges from suggestions, comments, fruitful discussions, or even lending their own books.

I am also thankful to Mr. Varghese K. (JNU/CSRD) for providing me the data and T. Selvam (JNU/CSRD) for his helps in handling GIS software. I acknowledge Puspita Datta (IIPS), Paramita Banerjee (JNU/CSRD) and Lopamudra Ray Saraswati (JNU/CSRD) for their helps regarding SPSS syntax, in particular when I was stuck for almost three months not knowing how to calculate IMR.
Much of this research depended on various references treasured at Central Library and EXIM Bank Library of JNU, Ratan Tata Library, and Libraries of IEG, NIHFW, NIPFP, and documentation units of various centres of JNU, e.g., CSRD, CWS and CSMCH. Cooperation of their staffs is worth mentioning.

I am at loss of words in expressing my gratitude to my parents and other family members whose continuous sacrifice and support helped me to pursue the luxury of this research.

I am also thankful for the financial support received from the University Grant Commission’s Central University Fellowship (Aug, 2007- Sep, 2008) and Indian Council of Social Science Research Doctoral Fellowship from Sep, 2008 to the end of this study. Unless I had these financial supports, I would have been distracted from concentrating in this research and unable to finish it within three years.

Lastly, not mentioning the everlasting encouragement and support of all my friends would be unfair. They are the first ones whom I might have bored by asking them to read my manuscripts even on the ‘much-awaited weekends’. To start with, I would like to mention Saikat Banerjee, whose immense wisdom helped me a lot and saved a lot of my time. Pintu Parui, the mathematical prodigy, helped me to solve a mathematical problem after several failures by several people. Samik, Dibyendu, Arindam da, Antu da helped me not only in the editing process but also with several discussions and unending debates. I would also like to convey my deepest gratitude to Protiva, Parama, Kaushik, Partha, Sourabh, Surajit da, Swapan, Paramita, Rajarshi, Sumita, Debsubhra, Moumita, Subrata, Soumendu, Pinki, Mrittika, Gokul, Rajdeep, Arijit, Shamindra, Sumit, Safayet, Sambuddha, Indrashis, Aniruddha, Mousumi, Swarnab, Chandan, Bipasha and Nora for their delightful company and constant encouragement.

All remaining errors, if any, will solely be my responsibility.

NILANJAN PATRA
