List of Tables

1.1 ICD 10 classification of Mental Retardation
1.2 Classification based on IQ
3.1 16 PF Dependability coefficients
3.2 16 PF stability coefficients
3.3 Equivalence coefficients of test forms for each trait.
3.4 Direct concept validities of the 16 PF scales
3.5 Indirect concept validities of the full 16 PF
4.1 Comparison of the parents of normal and mentally sub-normal children in terms of their personality traits.
4.2 Comparison of the high and the low scorers on Factor-A in terms of their scores on stress scale.
4.3 Comparison of the high and the low scorers on Factor-B in terms of their scores on stress scale
4.4 Comparison of the high and the low scorers on Factor-C in terms of their scores on stress scale.
4.5 Comparison of the high and the low scorers on Factor-E in terms of their scores on stress scale.
4.6 Comparison of the high and the low scorers on Factor-F in terms of their scores on stress scale
4.7 Comparison of the high and the low scorers on Factor-G in terms of their scores on stress scale
4.8 Comparison of the high and the low scorers on Factor-H in terms of their scores on stress scale
4.9 Comparison of the high and the low scorers on Factor-I in terms of their scores on stress scale
4.10 Comparison of the high and the low scorers on Factor-L in terms of their scores on stress scale
4.11 Comparison of the high and the low scorers on Factor-M in terms of their scores on stress scale
4.12 Comparison of the high and the low scorers on Factor-N in terms of their scores on stress scale
4.13 Comparison of the high and the low scorers on Factor-O in terms of their scores on stress scale
4.14 Comparison of the high and the low scorers on Factor-Q1 in terms of their scores on stress scale
4.15 Comparison of the high and the low scorers on Factor-Q2 in terms of their scores on stress scale
4.16 Comparison of the high and the low scorers on Factor-Q3 in terms of their scores on stress scale
4.17 Comparison of the high and the low scorers on Factor-Q4 in terms of their scores on stress scale
4.18 Comparison of the high and the low scorers on Factor-A in terms of their coping style.
4.19 Comparison of the high and the low scorers on Factor-B in terms of their coping style.
4.20 Comparison of the high and the low scorers on Factor-C in terms of their coping style.
4.21 Comparison of the high and the low scorers on Factor-E in terms of their coping style.
4.22 Comparison of the high and the low scorers on Factor-F in terms of their coping style.
4.23 Comparison of the high and the low scorers on Factor-G in terms of their coping style.
4.24 Comparison of the high and the low scorers on Factor-H in terms of their coping style.
4.25 Comparison of the high and the low scorers on Factor-I in terms of their coping style.
4.26 Comparison of the high and the low scorers on Factor-L in terms of their coping style.
4.27 Comparison of the high and the low scorers on Factor-M in terms of their coping style.
4.28 Comparison of the high and the low scorers on Factor-N in terms of their coping style.
4.29 Comparison of the high and the low scorers on Factor-O in terms of their coping style.
4.30 Comparison of the high and the low scorers on Factor-Q1 in terms of their coping style.
4.31 Comparison of the high and the low scorers on Factor-Q2 in terms of their coping style.
4.32 Comparison of the high and the low scorers on Factor-Q3 in terms of their coping style.
4.33 Comparison of the high and the low scorers on Factor-Q4 in terms of their coping style.
