ACKNOWLEDGEMENTS

I understand that behind any successful work, there is a long list of support without whom the task would have been difficult to implement. It is the same in my case too. It is my great pleasure to express my gratitude to the many people who generously helped me to bring this work to completion.

First and foremost, I would like to express my sincere gratitude to my supervisor Prof. S. Annapoorni, Department of Physics and Astrophysics, Delhi University. I sincerely owe my appreciation for the guidance received from her to handle the complexities of most problems both in the experiments and general routine, and for being a constant source of inspiration for me all these years. The present research could not have been completed without her expert guidance, constant supervision, and ongoing encouragement.

I convey my humble thanks to Prof. R.P. Tandon, Head of the Department of Physics and Astrophysics, University of Delhi, for his encouragement and for providing me all the research facilities to accomplish my Ph. D. work.

I sincerely thank Dr. Amita Chandra and Prof. R. P. Tandon, members of my research advisory group for being a very supportive and understanding committee and for the thoughtful discussions and valuable suggestions.

There is a long list of people who have supported me during all these years of my Ph. D. research work. Through their valuable knowledge and experience I have gained great confidence in myself and it has helped me immensely. I extend my special gratitude to Dr. Subhalakshmi Lamba, Indira Gandhi National Open University, Delhi, Dr. Rajdeep Singh Rawat, NIE, Nanyang Technological University, Singapore, Dr. D. Kanjilal, Dr. K. Asokan and Dr. Dinesh Chandra Agarwal, Inter University Accelerator Centre, Delhi, for their valuable discussions, guidance and help. Special thanks to Prof. T.R. Seshadri for keeping a wonderful and joyful environment which was always needed in tensed and tired situations.

It has been a pleasure to work in University Science Instrumentation Centre, Delhi University for all these years. I would to thank Mr. Mittal for introducing me to many
instruments in this centre making my life much easier. I also have to mention a very special “thank you” to Mr. Harsh Kumar, Mr. Arun Dhaiya, Mr. Rahul Bhardwaj, Mr. Manish Kumar and Mr. Rahul Kumar for their assistance in TEM and XRD work.

I would also like to acknowledge the M. Tech Nanoscience and Nanotechnology, University of Delhi for the VSM and XRD facilities and all its members: Mr. Anil, Mr. Sunil and Mr. Bijender for assisting in all official formalities.

I would like to thank Dr. Ashok Kapoor, Solid State Physics Laboratory, New Delhi for providing me an access to the FE-SEM facility.

I would like to sincerely acknowledge Inter University Accelerator Centre, Delhi for providing me the opportunity to access the swift heavy ion irradiation facility. I would also like to sincerely thank Dr. Ambuj Tripathi and Mr. Sunil Ojha at Inter University Accelerator Centre, Delhi for their assistance in FE-SEM and RBS measurements.

I am indebted to my seniors and colleagues for their important suggestions and encouragement of my studies and research. I have gained immensely from the valuable discussions with my seniors Dr. Rakesh Malik, Dr. N. Kamal Singh and Dr. Vivek Verma and would like to express my sincere thanks and gratitude for their support and encouragement throughout the period of my research.

I express my sincere thanks to all my lab members Manu Jain, Manisha, Lalit Kumar, Rohit Medwal, Mansi Dhingra, Rekha, Rajan Goyal and Ambika Negi and all friends at the Department of Physics and Astrophysics, University of Delhi for supporting me throughout this period and for a wonderful friendship and time spent together. My thanks to all my friends at home for being with me always.

A sincere thanks and appreciation goes to all the technical and administrative staff of Department of Physics and Astrophysics, University of Delhi for being so helpful and cooperative.

The financial assistance from Council for Scientific and Industrial Research (CSIR), India is gratefully acknowledged.

Words fall short to express my gratitude for the loving encouragement I have received.
from my parents, brothers, sisters and all family members. Without their constant support and inspiration all this would never have been possible. I sincerely thank my *mummy and papa* for their overflowing blessings, for making me believe in myself and for bearing with me throughout the tenure of the thesis. It is because of their love, patience and understanding that I am at this position.

I greatly owe to *Pooja di, Manish jij and Rohit bhaiya* for their moral support and constant encouragement. I am thankful to them for their prayers, love and inspiration without which I would not have successfully completed this work. I sincerely apologize to my niece, *Namu*, for asking her to stay away in times when distractions were not at all welcomed especially from someone as sweet and adorable like her. My sincere thank to all the members of my family for their blessings.

I once again would like to thank all for being with me always.

Date: May 2013                                    Neeru Sehdev
