LIST OF TABLES

CHAPTER - I

1.1 Future utilisation of iron oxide raw materials for world ferrite production 15
1.2 Iron oxide sources for ferrites preparations 16
1.3 Estimated world ferrite production for 1990 in metric tonnes per year 18

CHAPTER - II

2.1 Typical chemical composition of commercial iron ore 38
2.2.a) Chemical analysis of various iron ore rejects (major elements) 42
2.2.b) Trace (minor / rare) elemental analysis of the study samples and their hydroxide / formate precursors 43
2.3.a) Chemical analysis of iron reject (study sample - I) precursors ferric hydroxides (FH) and ferric formates (FF) and their thermal products, iron oxide 49
2.3.b) Chemical analysis of iron ore reject (study sample – II) precursors ferric hydroxides (FH) and ferric formates (FF) and their thermal products, iron oxides 50

CHAPTER - III

3.1 XRD data of iron oxides obtained by hydrazine equilibration and thermal decomposition of iron hydroxides and formates 65
3.2 Saturation magnetization values (σs) of iron oxides 69

CHAPTER - IV

PART - I

4.1.1 XRD data of iron oxides 81
4.1.2 Lattice parameter, porosity, magnetization and Curie temperature of MgFe₂O₄ prepared from iron oxides 84
PART - II

4.2.1 XRD data of MgFe$_2$O$_4$ obtained using iron oxides prepared from iron hydroxides/formates (study sample - I) 104

4.2.2 X-ray density, physical density and porosity of MgFe$_2$O$_4$ (study sample - I) 105

4.2.3 Lattice parameter, bond lengths and site radii of MgFe$_2$O$_4$ 106

4.2.4 Saturation magnetization ($\sigma_s$), $4\pi M_s$ and magnetone number ($n_0$) of MgFe$_2$O$_4$ 110

4.2.5 Comparative values of Curie temperature of MgFe$_2$O$_4$ prepared by different methods 125

PART - III

4.3.1 XRD data of Mn$_{0.5}$Zn$_{0.5}$Fe$_2$O$_4$ obtained using iron oxides prepared from iron hydroxide/formate (study sample - II) 154

4.3.2 Saturation magnetization ($\sigma_s$) of Mn$_{0.5}$Zn$_{0.5}$Fe$_2$O$_4$ at varied conditions/medium 155
