Acknowledgements

I owe my gratitude to all those people who have made this thesis possible and because of whom my research experience has been one that I will cherish forever.

My deepest gratitude goes to my supervisor, Dr Satish Kumar Awasthi. I have been amazingly fortunate to have a supervisor who gave me the freedom to explore on my own and at the same time the guidance to recover when my steps faltered. His patience and support helped me to overcome many critical situations and finish this research work. In addition, he was always accessible and willing to help his students with their research.

I offer my deepest regards and sincere thanks to Prof. S. M. S. Chauhan, head, Department of Chemistry, University of Delhi for providing me all possible research facilities.

I am indebted to Prof. P. Balaram, IISC Bangalore for his continuous help, inspiration and guidance.

I would like to acknowledge Dr M. Nethaji, IISC Bangalore and Dr Souvik Maiti, IGIB, Delhi for numerous discussions on related topics that helped me to improve my knowledge in the area.

I am also very grateful to my advisory committee members Dr D. S. Rawat and Dr A. K. Verma for their suggestions and encouragement. I am thankful to Dr Alka Agarwal and Dr Vibha Tandon for their valuable guidance. I warmly thank to Dr Morten Agertoug Nielsen, Faculty of Health Sciences, Copenhagen, Denmark for antimalarial screening of my compounds.

My special thanks to all non-teaching staff, USIC and Mr. Baldev Singh, Mr. Amit and Mr. Narendra, Department of Chemistry, University of Delhi, Delhi for all the help they provided me during my stay.

My sincere thanks to Dr Nidhi Mishra, Dr Brajesh Kumar, Dr Vijay Kumar Rai, Dr Ankita Rai, Dr Jyoti Singh, Dr Meenakshi Pandey, Dr Sandeep K. Dixit, Dr Neesha Yadav, Dr Shikha Singh and Dr Nidhi Tyagi for providing me all help and guidance. Without their support this work was not possible.
I am very thankful to my friends Ms. Shweta Shekhar, Ms. Vartika Singh, Ms. Priyanka Khanduri and Ms. Shikha Singh, who always helped me stay sane through these difficult years. Their support and care helped me to overcome setbacks and stay focused on my research work. I greatly value their friendship and deeply appreciate their belief in me.

I would also like to thank Yogesh Patil, Kuldeep Mahiya, Vinod Kumar, Dinesh Shukla, Awanish Kumar, Rohit, Susheel, Renu, Mr. Atul, Vinod and Yash Mangla for their help.

I especially want to thank my lab mates Ms. Alka Pandey, Shrawan Mangawa, Ashawani Singh, Arvind, Pavneesh Mani, Satyanand Kumar, Ms. Gunjan Pandey, Chiranjeev Sharma and Kumkum for their help.

I am also thankful to Sandeep Sir, Pankaj Sir, Muzaffar Sir, Rajneesh, Piyush, Saurabh, Vinoy and Pushpendra for their help and encouragement.

Most importantly, none of this would have been possible without the love and patience of my family. My grandparents to whom this thesis is dedicated to, have been a constant source of love, concern, support and strength all my life. I would like to express my heartfelt gratitude to my father and mother who raised me with a love of science and supported me in all my pursuits. I have to give a special mention for the support given by my In-laws who encouraged me throughout this endeavour. I express my deep gratitude to Mr. Janmajaay Singh who always motivated and guided me in every aspect of my life. I am very obliged to Mr. Akhand, Shivani, Jyotsana, Jyoti and Shivendu. Words would never say how grateful I am to all of you.

Most of all I am grateful to my loving, supportive, encouraging, and enduring husband Jyotish Nendra Pratap Singh for his faithful and persistent support throughout. He was a constant source of warm encouragement and adoration in every moment of my research career. This thesis could not have been accomplished without him.

Last but not least, thanks to God for providing me this opportunity and granting me the capability to proceed successfully.

Shailja Singh
