ACKNOWLEDGEMENT

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here. This is the toughest of all the tasks in writing a thesis, I will nonetheless try.

I am deeply grateful to my supervisor, Professor Diwan S. Rawat, Ph.D., Department of Chemistry, University of Delhi, for his detailed and constructive comments for the present thesis, and for his important support throughout this work. In addition, he was always accessible and his understanding and encouraging research guidance has provided a good basis for the present thesis. His kindness, simplicity and integrity shall always be the lighthouse and motivation to guide me through the journey of life. His perpetual energy and enthusiasm in research had motivated all the research students in the Department of Chemistry, University of Delhi, including me.

I would like to record my deep and sincere gratitude to my co-supervisor, Professor Hanumantharao G. Raj, Ph.D., Formerly Head of the Department of Biochemistry, V. P. Chest Institute, University of Delhi, for being a constant source of encouragement. His ability to probe beneath the text is a true gift and his insights have strengthened this study significantly. I will always be indebted to his constant support, encouragement and most importantly, constructive criticism which has helped me to develop a healthy attitude towards science and research, infact I am proud and feel blessed of being his student.

I would like to express gratitude to Professor Srikant K. Kukreti and Dr. Mahendranath, who are members of my Ph.D advisory committee for giving me constant encouragement and wonderful suggestions.

I am grateful to Professor Virinder S. Parmar and Professor Ashok K. Prasad, Department of Chemistry, for helping me during my Ph.D by kind supply of a numbers of test compounds used in the present work and by their valuable advice and support.
I especially want to thank Professor Daman Saluja, Ph.D., Dr. B.R. Ambedkar Centre for Biomedical Research, University of Delhi, for her advice and supervision, which made crucial contribution to this research and so to this thesis. I most humbly thank her for giving me an opportunity to conduct initial cloning experiments under her vigilant and enthusiastic guidance. I am indebted to her for making me learn site-directed mutagenesis and for every support and encouragement during my thesis.

I am thankful to Prof. B. S. Dwarkanath, Ph.D., INMAS, for his support and permission in performing flow cytometric experiments in INMAS.

I would also like to express my grateful thanks to Dr. Jyotsna Pandey, my biology teacher during school days for arousing my interest in research and fascinating me to pursue this as my career.

I would like to thank Dr. Vishwajeeet Rohil for his support and encouragement.

The laboratory assistance and any sort of help provided by Samreshji are thankfully acknowledged.

I would like to thank my senior Dr. Ajit Kumar for providing great assistance in winding up and proof reading of my thesis. He was the most supportive person in the lab.

I would like to thank all my seniors Dr. Shvetambri, Dr. Tapesh, Dr. Anil, Dr. Santram, Dr. Prija Dr. Prabhjot, Nivedita, Rajesh, Rashmi who deserve special thanks for their cooperation and for sharing all fluctuations and providing Comic relief during the progress of my research work.

My very special colleague Dr. Sushma, deserves a heart touching thanks for being there with me whenever I needed her. She was there with me from the very beginning from making me learn how to isolate rat trachea to proofreading of my thesis. I am gratefully thankful to her.

I thank Dr. Sukanya, Nisha, Naresh, Dr. Neetu Beetal, Anju, Kapili, Abhimanyu, Anupam who have always been a constant source of encouragement during
my research period. I also thank Dr. Mukul, Dr. Nitin, Sunny, Beena, Deepak, Seema, Mohit, Anuj, Chinna for every possible help from them whenever I needed.

I would like to thank my Mamaji, Professor R. K. Pandey for giving me motivation and being a great source of inspiration to work in field of research.

Now I come to thanks very special persons who deserves sentiments, love & regards. They always helped me whatever I needed from them. They gave me emotional, moral and practical support during my toughest time. You both will always be in my prayers. You are a true gift of god as a sister Penny! Thank you so much Penny and Santosh Jijaji.

I would also like to thank my sister Annie di, Karunesh Jijaji for their support. I am happy to have an adorable niece Lavya, the time spent with her made me forget all my worries. I feel proud of my sister, Mini, for her talents. I cherished the support between me and her. I would also like to thank my sister Disha, for the help during the writing of my thesis. She was really sweet with her eversmiling disposition to help me.

My deepest gratitude goes to my family for their unflagging love and support throughout my life. I am indebted to my parents, the unseen contributor in this effort, who have been my pillars of strength and support and a constant source of love, affection, blessings and encouragement. I have no suitable word that can fully describe their everlasting love for me. I remember their constant support when I encountered difficulties. Asking by them “How much is left now”? was something which worked as a driving factor for pushing me to write my thesis. This thesis would have been simply impossible without them.

Most of all, my endless thanks to Almighty God, for making my dream come true and making my academic aspirations a reality. May your name be exalted, honored, and glorified.

Rini Joshi
