ACKNOWLEDGEMENT

With great pleasure I express my deep sense of gratitude to Dr. M.S. Razeena Padnam, my supervisor, for her unfaltering guidance, valuable suggestions and meticulous care with which she scrutinized each page of this thesis.

I am grateful to Dr. K.A. Kumar, Hon. Director, School of Behavioural Sciences for providing me all the facilities for bring out this thesis.

I also thankful to all the faculty members of School of Behavioural Sciences for their timely help and suggestions.

I acknowledge my profound gratitude to Prof. V. George Mathew, Department of Psychology, University of Kerala and Dr. Sreedevi Ammal, Department of Psychology S.N. College Chempazhanthy, Thiruvananthapuram for permitting me to use their psychological tests.

I place on record my most sincere thanks to Dr. SankaranKutty and other physicians of Government Ayurveda College and Panchakarma Hospital for their whole hearted co-operation without which my work would not have been completed.

I am greatly indebted to the Librarians of School of Behavioural Sciences and University library, who showed genuine interest on this work and helped me in the review of literature.

Special thanks are expressed to all the patients and other individuals who extended their willingness as part of this work.

I am grateful to Mr. Raghavan Pillai for going through this work and giving appropriate suggestions.

I sincerely thank the Darshan Computers, Kollam for the word processing and photo copying this work.

Rajeev Kumar. N.
