Acknowledgement

It gives me immense pleasure in reminiscing and acknowledging all the people who have encouraged and contributed academically and emotionally during the course of this thesis.

I express my heartfelt thanks and sincere gratitude to my mentor and guide Prof. B. S. M. Rao, Department of Chemistry, University of Pune for his motivation, excellent guidance and valuable suggestions throughout the course of this work. It has been a privilege being his student and indeed a rewarding experience working with him. He has also been personally very helpful to me like a father and friend.

I am very grateful to my co-guide Dr. K. I. Priyadarsini from Bhabha Atomic Research Centre (BARC), Mumbai for her fruitful suggestions and supervision. I sincerely thank late Dr. Hari Mohan from BARC for his help and advice in performing some of the pulse radiolysis experiments.

I would like to thank Dr. S. Naumov, Leibniz-Institut für Oberflächenmodifizierung, Leipzig, Germany for his help in theoretical calculations.

I express my indebtedness to Prof. Taiha Joo, Department of Chemistry, Pohang University of Science and Technology (POSTECH), South Korea, for his earnest help and guidance in performing the fluorescence experiments and to Myeongki for assisting me in my work. Thanks are also due to Chul hun, Intae Eom, So hyun, Seung Noh, Eun jin, Jung wa and Bongwhan for their kind help. The financial support from Korea Science and Engineering Foundation, South Korea during my stay there is also acknowledged.

I am grateful to all my friends at POSTECH Jin, Henna, Anupriya, Prashant, Nitin, Jayshree, Ganapati, Yasir, Prof. Rajagopalan Sundaram, Ina and my roommates Saebom and Daniela who made my stay in Korea exciting and enjoyable.

I am thankful to Prof. Ian Carmichael, Director, Notre Dame Radiation Laboratory (NDRL), University of Notre Dame, USA for providing me with all the necessary facilities and financial support during my stay at NDRL, where a part of my work on chalcones was carried out. Special thanks are due to Dr. Gordon Hug for his constant aid and supervision in carrying out the experiments. It has been an enriching experience working with him.
I am extremely thankful to Dr. John Bentley and Dr. Prashant Kamat for their kind hospitality and caring attitude during my stay at Notre Dame.

I take this opportunity to thank the Head, Department of Chemistry, University of Pune for providing me with the laboratory facilities, Dr. A. S. Kumbhar, Project Coordinator for the Pune University LINAC facility and the Director, Chemistry Group, BARC for the BARC LINAC facility.

I also am thankful to my labmates from BARC Beena, Atanu, Amit and late Umang for their assistance and support in carrying out the experiments there.

I would like to thank my seniors – Anass, Kiran and specially Geeta for helping me in my difficult time.

I extend my sincere appreciation to my labmates Pooja, Mukula, Suvarna, Ajit and Deepika for their co-operation and for maintaining a pleasant and comfortable environment in the lab. Special mention goes to Manjusha for always being there with me in my good and bad times. I am also grateful to the research students and friends from the Department of Chemistry- Vitthal, Vijay, Sarika and Sadanand for their timely help.

I wish to thank Manju and Nilesh for their technical support and assistance in the LINAC experiments.

I would like to express my deepest gratitude to my Dad, Mom, brothers- Damodar and Sandeep, my sister-in-law Anupama, my niece Aasmi and my nephew Ansh for their unflinching faith in me. Their co-operation and encouragement has always inspired me in my endeavour.

I am also deeply grateful to my parents-in-law, brothers-in-law- Pravin, Akash and Sachin, my sisters-in-law- Bharati and Trupti and my nephew Advait for being thoughtful and caring in bringing this task to fruition.

Finally, I shall never forget the contribution of my husband Rajesh who shared all the moments of zeal and woe with me during the entire period of the work with great patience, love and understanding. This work could have never reached its present status without his constant support all the way.

The financial support from BARC, Department of Atomic Energy, during the course of this work is gratefully acknowledged.
