Contents
CHAPTER 1 : INTRODUCTION

1.1 General Aspects of Radiation and Photochemistry 1
1.2 Interaction of Radiation with Matter 3
1.3 Sources of Radiation 5
1.4 Radiolysis of Water 7
1.5 Products of Water Radiolysis 12
1.6 Radiation Chemical Yields 15
1.7 Generation of Specific Radicals 16
1.8 Generation of Secondary Radicals 18
1.9 Radiation Chemical Techniques 21
1.10 Determination of Rate Constants 22
1.11 Steady State Radiolysis 24
1.12 Femtosecond Fluorescence Spectroscopy 25
1.13 Scope of the Work 27

CHAPTER 2 : EXPERIMENTAL

2.1 Chemicals 34
2.2 Pulse Radiolysis Facilities 35
2.3 Thiocyanate Dosimetry 40
2.4 Steady State Radiolysis 41
2.5 Computational Methods 43
2.6 Femtosecond Spectroscopy 44
2.7 Steady State Absorption Measurements 46
CHAPTER 3: RADIATION INDUCED OXIDATION OF INDOLE DERIVATIVES

3.1 Introduction 47
3.2 Kinetics and Spectra 48
3.3 Radical Adduct Formation 59
3.4 Redox Titration 62
3.5 Quantum Chemical Calculations 65
3.6 Reaction Mechanism 70
3.7 Product analysis 76
3.8 Conclusions 79

CHAPTER 4: FLUORESCENCE STUDIES OF HYDROXY INDOLE DERIVATIVES

4.1 Introduction 81
4.2 Fluorescence from Multiphoton Excitation 82
4.3 Emission Mechanism 88
4.4 Conclusions 90

CHAPTER 5: REDOX CHEMISTRY OF CHALCONES

5.1 Introduction 91
5.2 Reaction of \( \text{OH} \) Radical with Indole Chalcones 92
5.3 Reactions of One Electron Oxidants with Indole Chalcones 97
