2.1.8 Positional asymmetry and the role of phonological strength 28
2.1.9 Integrated phonetics phonology model and patterning of sounds 28
2.1.10 Licensing by cue model 29
2.1.11 Pure Prominence approach 29
2.2 Strength asymmetry and phonetic correlates 31
2.2.1 Duration 32
2.2.2 Fundamental Frequency and Pitch pattern 32
2.2.3 Intensity and Loudness 33
2.3 Positional faithfulness, Positional augmentation and strength effects in phonology 33
2.3.1 Initial Strengthening 34
2.3.2 Final Domain and Strength effects 40
2.4 Element theory: a correlation between prosodic and melodic strength 44
2.5 Conclusion 47

CHAPTER 3: STRENGTH RELATIONS AND SOUND PATTERNS: AN ANALYSIS IN THE FRAMEWOK OF GOVERNMENT AND DEPENDENCY PHONOLOGY

3.0 Introduction 48
3.1 SECTION I Government phonology: an overview 49
3.1.1 Constituent structure constituent government in GP 50
3.1.2 The principles of constituent government in GP model 51
3.1.3 Interconstituent government in GP model 53
3.1.4 Licensing Principle 54
3.1.5 Coda licensing Principle in GP 54
3.1.6 Empty Category Principle 56
3.1.7 The Phonological ECP 56
3.1.8 Parametric domain final p-licensing 57
3.1.9 Proper Government 57
3.1.10 Inter onset Government 58
3.1.11 Magic licensing 59
3.1.12 Element Theory and Government Phonology: evidence from Assamese 60
3.1.13 Complexity Condition in GP model 63
3.2 Government phonology and Disordered speech: a correlation 66
3.3 Section II: Dependency Phonology, an analysis 68
3.3.1 Strength relations of segments and Dependency phonology 69
3.3.2 Dependency, Construction and Structural analogy 70
3.3.3 Principle of Unarism and Componentiality in DP in the light of Assamese 73
3.3.4 Categorial gesture and consonantal representation in DP model 77
3.4 A comparative study between DP and GP in regards to phonological strength and concluding remarks 81

CHAPTER 4: A PHONOLOGICAL ACCOUNT OF ASSIMILATION IN OPTIMALITY THEORETIC PERSPECTIVE AND STRENGTH ASYMMETRIES 84-111

4.0 Introduction 84
4.1 Assimilation from the perspective of positional faithfulness theory, perceptual account and P-map theory: Evidence from Assamese 85
4.1.1 Beckman, Positional faithfulness view and the process of assimilation 86
4.1.2 Steriade, Licensing by Cue, P-map theory and the process of assimilation 87
4.2 The process of Assimilation in Assamese 90
4.2.1 Voicing assimilation in Assamese 91
4.2.2 Voicing assimilation in Assamese in the framework of SPE and Autosegmental framework 97
4.3 Assamese nasal assimilation 101
4.3.1 Word internal nasal assimilation 101
4.3.2 Blocking of nasal assimilation across word boundary 102
4.4. Assimilation and strength relations in Assamese phonotactics 103

4.3.3 Nasals as undergoer of assimilation: a perceptual explanation 104

4.3.4 Assamese voicing assimilation and Optimality Theoretic constraint 105

4.3.5 Assimilation as blocked by nasals and liquids: an analysis 107

4.5 Conclusion 110

CHAPTER 5: SPIRANTIZATION AND STRENGTH RELATIONS IN ASSAMESE: AN OPTIMALITY THEORETIC ACCOUNT 112-136

5.0 Introduction 112

5.1 Lenition from the perspective of feature spreading and sonority promotion 112

5.2 Lenition and articulatory effort 113

5.3 Coda deaspiration in Assamese 119

5.3.1 Assamese coda deaspiration and Autosegmental representation 124

5.3.2 Spirantization, coda deaspiration and OT constraints 126

5.4 Assamese data on spirantization and OT constraints: an analysis 131

5.5 Conclusion 136

CHAPTER 6: SONORITY, OPTIMALITY, BINDING PRINCIPLE AND PHONOTACTICS: EVIDENCE FROM ASSAMESE CONSONANT CLUSTER 137-173

6.0 Introduction 137

6.1 Sonority and cross linguistic phonotactics 138

6.1.1 Syllable in Optimality 140

6.1.2 Constraints on sonority distance 144

6.1.3 Sonority distance from onset to nucleus 144

6.1.4 Sonority distance within a complex onset 145

6.1.5 The range of values of MSD 146
6.1.6 Sonority distance in syllable contact 146

6.2 Assamese phonotactics and initial onset consonant cluster 147
6.2.1 Branching onsets in Assamese: 150
6.2.2 Some observations in the patterning of Assamese phonotactic in the light of Government theory, Binding parameter and Optimality theory 156

6.3 Assamese phonotactics, Binding Principle and OCP constraint 163
6.3.1 Binding Principle and Assamese phonotactics 164
6.3.2 OCP constraint and Assamese Phonotactics 165

6.4 Word Final Consonant cluster in Assamese 166
6.5 sC cluster in Assamese phonotactics 167
6.6 Sonority and its criticism 171
6.7 Conclusion 172

CHAPTER 7: ASPIRATION, h-DELETION AND GEMINATION: STRENGTH ASYMMETRY 174-203

7.0 Introduction 174
7.1 Element theory and strength relations 175
7.1.1 Aspiration, Headedness and Prosodic Positions 177
7.1.2 Melodic strength: Evidence from Indian Languages 181
7.2 h- deletion in Hindi and the notion of Phonological strength 183
7.2.1 Acoustic properties of h in different prosodic contexts 184
7.2.2 Result of the investigation 187
7.3 Gemination and the notion of phonological strength 190
7.3.1 Gemination as a process of fortition 190
7.3.2 Geminates and HDP 193
7.3.3 Onset and coda asymmetry: evidence from the data of assimilation on Sanskrit Pali geminates 195
7.3.4 Gemination as a process triggered by liquids and semivowels

7.4 Conclusion

CHAPTER 8: CONCLUSION

8.0 Summary of the thesis

8.1 Phonological findings
   8.1.1 Assimilation and phonological strength findings
   8.1.2 Spirantization and phonological strength findings
   8.1.3 Aspiration and phonological strength findings
   8.1.4 Gemination and phonological strength findings
   8.1.5 Consonant cluster and phonological strength findings

8.2 Phonetic findings

8.3 Reservations
