CHAPTER 3  RESULTS

3.1 Identification and purification of a cell surface antigen

3.1.1 In vitro lysis and lysis protection assay 39

3.1.2 Preparation of plasma membranes and use of membrane extracts in the lysis protection assay 40

3.1.3 Purification of the protein 41

3.1.4 Homogeneity of the purified antigen preparation 42

3.1.5 Determination of the molecular weight of the antigen 43

3.2 Molecular characterisation of the protein 44

3.2.1 Immunological crossreactivity of the antigen with albumin 44

3.2.2 Isoelectric focussing of the antigen 45

3.2.3 Periodic acid Schiff's staining of antigen 45

3.2.4 Amino acid analysis 45

3.2.5 Peptide mapping of the antigen and albumin 45

3.2.6 Analysis of the poly A+ message from AK-5 46

3.2.7 Northern hybridisations using albumin specific cDNA probe 47

3.2.8 Analysis of the genomic DNA for the rearrangement and amplification of the gene 48
3.2.9 Absence of the message specific for alphafetoprotein in AK-5

3.3 Tumor specific nature of the antigen

3.3.1 Western blot analysis of the AK-5 membrane proteins using anti-AK-5 antibodies

3.3.2 Purification of the antigen from AK-5 plasma membranes

3.3.3 Immunological crossreactivity of the antigen with albumin

3.3.4 Though similar, albumin and antigen are unidentical

3.3.5 Tumor specific nature of the protein

3.3.6 Purified antigen is identical to the active component of the assay

3.3.7 N-terminal sequencing of the antigen and rat serum albumin

CHAPTER 4 DISCUSSION

4.1 Observations of the present study

4.2 Protein purification

4.2.1 Purification of tumor antigens

4.2.2 Solubilization of cell surface antigens

4.2.3 Use of high salt extractions to obtain the crude antigen for purification

4.2.4 Purification of cell surface antigens

4.2.5 Purification of the antigen (AK-5 antigen) using chromatographic procedures
4.2.6 Determination of the molecular weight and resemblance of the antigen with rat serum albumin

4.3 Comparative analysis of albumin like antigen and albumin

4.3.1 Immunological crossreactivity of the antigen with albumin

4.3.2 Analysis of the albumin specific transcript in AK-5

4.4 Is the aberrant expression of the gene in AK-5, a consequence of presence of liver specific trans-factors?

4.5 Tumor specific nature of the antigen

4.6 Possible involvement of AK-5 antigen in rejection

4.7 Expression of an albumin like antigen in a rat histiocytoma - can one speculate based on such an event regarding the origin?

CHAPTER 5 REFERENCES
