Acknowledgement

Many people have been generous and helpful during my research period and have assisted me in the successful completion of my PhD. With deep sense of gratitude, I would like to thank my supervisor Prof. A.L. Ramanathan, School of Environmental Sciences, Jawaharlal Nehru University, New Delhi for his expert guidance, patient hearing, constant support, valuable suggestions and constant encouragement all through these years. I would like to thank him from the core of my heart for his patience and consistent effort at each and every stage of my PhD. He showed me novel ways to approach a research problem and the need to be persistent in order to accomplish any goal.

I am indebted to my co-supervisor Dr. Joyanto Routh, Dept. of Earth Sciences, IISER-Kolkata, for providing me a unique opportunity and complete freedom to work at Dept. of Geology and Geochemistry, Stockholm University, Sweden. Joy introduced me to the exciting world of Organic Geochemistry. It was his vast knowledge, able guidance and expertise that gave me better understanding of “Organic Biomarkers”. Joy has been a friend, philosopher and guide. He taught me to write academic papers and had confidence in me when I doubted myself and extracted the best from me. Most importantly, he taught me to be hard working. He always welcomed me with a pleasant smile, tolerantly answered semiprernal queries and patiently reviewed endless number of drafts of my PhD thesis. Without his encouragement and steady supervision (and the loving care for me at SU and IISER-K), I could not have finished this thesis.

I am thankful to Prof. K.G. Saxena, former Dean, SES, JNU and present Dean, Prof. Sudha Bhattacharya for their co-operation and kind support and for providing the necessary facilities for this work.

I would like to express my sincere thanks to Prof. J. Val Klump, Great Lakes WATER Institute, University of Wisconsin-Milwaukee, USA for $^{10}$Pb dating of the sediment samples and his excellent suggestion towards the improvement of my thesis, and interpretation of data regarding stoichiometry model. Words fail to express my gratitude for Prof. Jürgen Rullkötter, University of Oldenburg, Germany for his vital inputs and suggestions regarding detection of GC-MS peaks for Lipid analysis.

I would also convey my sincere gratitude to Dr. S. Chidambaram, Anna Malai University, Annamalainagar and M.V. Prasanna helped with sampling and P. Purushothaman helped in preparing the location map.

I am also thankful to UGC fellowship for providing me financial assistance to carry out my research work in India, and FORMAS for providing me financial assistance to carry out my research work in Sweden.

I wish to thank Dr. Gajiyud, B.D. Sharma and all the staff of CIF for their help. I take this opportunity to thank Mr. S.D.S. Rawat, Mr. Anreek Singh, Mrs. Bhatia, and all the staff of School of Environment Sciences. I also thank Late Mr. Khanna, and Mr. Lamba in UGC fellowship section for all the timely help he extended. I would like to extend my thanks to Chatterjee Ji, K. Murali, and Mani.

I would also express my sincere gratitude to all my colleagues and friends at Department of Geology and Geochemistry, Stockholm University, for providing a friendly and stimulating work environment. I would like to sincerely thank Supriyo and Preetam for enlightening my research.
spirit. They not only helped with the analysis but also hassled me to improve. I extend my heartfelt thanks to Klaara and Hieki for their assistance in laboratory. Special thanks goes to Pia Ma'am, Soumi, Puja, Mohanthy, Satya, Ruby and Pushkar for the making my stay at Stockholm memorable. Words are insufficient to thank Arindam and Joyeeta Bhattacharyya for their support and for providing enthusiasm in work whenever I was low or impetuous.

I would like to have a special mention of Mangrovers at JNU; particularly Gurmeet Sir and Rita Ma'am, with whom it was a pleasure to work with during my PhD. The interesting scientific discussions and chats we had became the pillars for this research work. I wish to convey special thanks to Gurmeet Sir for all his help with data interpretation, explanations, reviewing the first drafts of each chapter and formatting of the thesis. It was and it will be a dream workgroup to work with. I thank Dr. MBK Prasad for his constant suggestions and guidance. I wish to thank Jayjit, Rajkumar, Pankaj, Rampravesh, Ankur, Goutam, Ravi and Sadaf for their constant support during my PhD. The constant support that has been bestowed upon me by my juniors particularly Shyam and Swati (Mangrove Newbie) make them very special to me. I deeply acknowledge their cooperation. I take this opportunity to thank my special junior Alok who has always brought a breeze of happiness with him which made the lab hours less tedious and monotonous. He has been a pillar of strength for me and I could always rely on him especially during the late working hours.

I convey my gratitude to all my seniors including Dr. Jose, Manju Ma'am, Jaya Lakshmi, Jaya Ma'am, Anurag Sir, Parmanand Sir, Manish Sir, Sachin Sir and Sanjay Sir for their support. Special thanks to Shruti Ma'am for her support and efforts in making me patient. I would like to express my thanks to Malti Sir, who was always there with his love and support. I thank Vishwamohan, Kushagra, Shashi, VR Sharma, Udbhav Ji, Farooq, Viren, Manoj and all my labmates for their support.

I would like to acknowledge my seniors Shastri Sir, Ankit Sir, Prashant Sir, Bhaswati Ma'am and my classmates Deepak, Shibaji, Vijay pal, Akanksha and Pradipta for their support.

I would like to especially thank Manoj, Dr. Chandrakiran, Sunil and Vijay who were constantly encouraging me throughout the years, lending an ear to whatever I said and for putting a tab whenever I went overboard with my impulsiveness. I would like to thank Chander, Munna, Ankur, Sudhir, Anjani, Prashant, Satyam, Shruti, Arup, Arun, Avinash, and all my friends for their constant support and for boosting my confidence.

I would like to acknowledge of my relatives, Ramesh Bhaiya, Jhaboo Bhaiya and Babloo Bhaiya, for encouraging and motivating me during my PhD.

Some people walk into your life because they have been sent by God to make you realize that you hold a special place in God's heart. They make things simpler for you, share your tears and are there beside you whether you are a failure or an achiever. Shray has been like that for me since the day I met her. No written acknowledgement can express my thanks to her for having faith in my abilities, for her constant encouragement and for providing moral support.

I would like to thank Papa, Mummy, Seema Didi, Jiju, Shalini, Neelam and Aabha for always being there for me, providing me constant support and encouragement during the ups and downs of life.

Rajesh Kumar Ranjan
