List Of Figures

Fig 1.1 Particles transformation and growth mechanisms (e.g., nucleation, condensation, and coagulation) 5
Fig 1.2 An idealized distribution of ambient PM showing fine mode particles and coarse mode particles and the fractions collected by size selective samplers 7
Fig 3.1 Map of Delhi showing sampling sites 40
Fig 4.1 Annual average concentrations (μg/m³) of particulate matter fractions at three different sampling sites 50
Fig 4.2 Monthly (average) concentration of SPM (in μg/m³) at three sampling sites 51
Fig 4.3 Monthly concentration of PM₁₀ (μg/m³) at three different sampling sites 51
Fig 4.4 Monthly concentration of PM₂.₁ (μg/m³) at three different sampling sites 52
Fig 4.5 Seasonal variation of SPM, PM₁₀ and PM₂.₁ at different sampling sites 53
Fig 4.6 Percentage distribution of mass concentration of different particulate fractions at three different sampling sites 54
Fig 4.7 PM₂.₁/SPM, PM₂.₁/PM₁₀ and PM₁₀/SPM ratios at Site-I PN 54
Fig 4.8 PM₂.₁/SPM, PM₂.₁/PM₁₀ and PM₁₀/SPM ratios at Site-II NP 55
Fig 4.9 PM₂.₁/SPM, PM₂.₁/PM₁₀ and PM₁₀/SPM ratios at Site-III JNU 55
Fig 4.10 Size distribution of PM₁₀ at Site-I PN 58
Fig 4.11 Size distribution of PM₁₀ at Site-II NP 59
Fig 4.12 Size distribution of PM₁₀ at Site-III JNU 60
Fig 4.13 Trace metal, crustal metal & ion concentrations in SPM, PM₁₀ & PM₂.₁ at site I-PN 63
Fig 4.14 Trace metal, crustal metal & ion concentrations in SPM, PM₁₀ & PM₂.₁ at site II-NP 67
Fig 4.15 Trace metal, crustal metal & ion concentrations in SPM, PM₁₀ & PM₂.₁ at site III-JNU 71
Fig 4.16 Spatial distribution of annual average concentration (µg/m³) of (i) Trace metals, (ii) Crustal Metals & (iii) Inorganic ions in SPM

Fig 4.17 Spatial distribution of annual average concentration (µg/m³) of (i) Trace metals, (ii) Crustal Metals & (iii) Inorganic ions in PM₁₀

Fig 4.18 Spatial distribution of annual average concentration (µg/m³) of (i) Trace metals, (ii) Crustal Metals & (iii) Inorganic ions in PM₂₁

Fig 4.19 PM₂₁/PM₁₀ ratios of analyzed species at three sampling sites

Fig 4.20 Percentage distribution of analysed and unanalyzed components in different particulate matter fractions at three sampling sites

Fig 4.21 Percentage distribution of Trace metals in SPM, PM₁₀ and PM₂₁ at different sampling sites

Fig 4.22 Percentage distribution of Crustal metals in SPM, PM₁₀ and PM₂₁ at different sampling sites

Fig 4.23 Percentage distribution of Ionic components in SPM, PM₁₀ and PM₂₁ at different sampling sites

Fig 4.24 Linear regression relationship between particulate fractions at site-I PN (i), (ii); Site-II NP (iii) & site-III JNU (iv)

Fig 4.25 Plot showing Multi Linear Regression (MLR) relationship among different particulate fractions at site-I

Fig 4.26 Linear regression relationship between particulate fractions and analyzed species at site-I PN

Fig 4.27 Linear regression relationship between particulate fractions and analysed species at site-II NP

Fig 4.28 Linear regression relationship between particulate fractions and analysed species at site-III JNU

Fig 4.29 Enrichment factor of individual metallic elements in different particulate fractions at Site-I PN

Fig 4.30 Enrichment factor of individual metallic elements in different particulate fractions at Site-II NP
Fig 4.31 Enrichment factor of individual metallic elements in different particulate fractions at Site-III JNU
