ACKNOWLEDGEMENT

I acknowledge with gratitude my indebtedness to everyone who has contributed towards the completion of this thesis.

First and foremost, my sincere regardful thanks to Dr. S. Bhushan, (Retd.) Prof. and Head, S.o.S. in Physics, Pt. Ravishankar Shukla University, Raipur (C. G.) for his stimulating guidance. He has been a perennial source of inspiration during my research work. The unflinching faith in the Almighty and the firm commitment to hard work are the two out of many other important valuable things I have learnt from him, which I believe will be guidelines for me for the rest of my life. My sincere gratitude to Mrs. Indira Shrivastava and especially Shivanshu Shrivastava (third year, B.E.), whose polite, affectionate and caring behaviour during my research work has left a deep obligatory impression in my heart.

My sincere thanks to UGC, New Delhi for granting me UGC-Teacher Fellowship for two years, without which this work would not have been possible.

I express my heartfelt gratitude to the Principal, Dr. Deepak Karkoon and all my colleagues and the office staff-members of Govt. College, Utai, Durg for their help and support.

I am also thankful to Dr. A. K. Singh and Dr. N. S. Suryanarayan of Govt. Science College, Durg for their help and suggestions. I am especially thankful to my colleague Mr. S. Sharma, Asstt. Prof., Govt. College, Utai, Durg who has always been very affectionate and guiding to me all the time.

I am thankful to IUC-DAE, Indore (M. P.) for the XRD and SEM studies.
I would like to take this opportunity to express my sincere thanks to all the faculty-members of S.o.S. in Physics: Dr. S. K. Pandey (Present Head), Dr. R. C. Agrawal, Dr. R. N. Baghel, Dr. N. Brahme, Dr. D. P. Bisen, Dr. A. S. Gaur for their encouragement, guidance and blessings.

The office staff, technicians and attendants working in S.o.S. in Physics and USIC were very supportive. I would like to thank Mr. K. P. Rathore, B. K. Jethwa, N. K. Yadu, K. L. Rawte, S. C. Soni, S. K. Yadav, K. Sonwani, Indirawati, Duryodhan and Sarita, especially for their day-to-day services and assistance.

I would like to thank my research colleagues Dr. S. Shrivastava, Dr. S. Pillai, Dr. A. K. Shrivastava, A. Oudhia, S. Agrawal and K. Deshmukh for their encouragement, advice and practical comments.

My special thanks to my wife Mrs. Sheela Singh, without whose cooperation, inspiration, understanding and encouragement, I would not have been able to complete this research work. My son Abhishek Kumar Singh (B. Tech., I.I.T.-Delhi), and my daughters Shikha Singh (final year, M.B.B.S.) and Neha Singh (second year, B.E.) do deserve special appreciation for their support, help and cooperation. Abhishek has really helped me by making available some very important research-papers from IIT, Delhi as well as helping me in some crucial computer jobs, which otherwise would have really been difficult. It was really a fun learning from my son.

The blessings of my parents, my mother, Mrs. Manti Singh and father, Mr. R. E. Singh and just a few words of thanks will not be able to express my indebtedness to them. I would also like to express my gratitude to my mother-in-law, Mrs. R. Singh for her support and encouragement extended to me during the tenure of this work. Last but not
the least, I would like to thank my younger brother U. S. Singh and his family for contributing in their own affectionate ways.

Once again, I express my deep sense of obligations to all known and unknown persons for their cooperation without which this thesis could not have been completed.
