Acknowledgement

“There is nothing like dream to create the future. Utopia to day, flesh and blood tomorrow”

Victor Hugo, Les Misérables, 1862

Words fail me to express my contentment and joy at this moment. The seemingly endless journey has finally finished. It’s the time to rejoice and thanksgiving! The years of sweat, toil and patience that have gone into the making of this thesis would not have come by without the good wishes and support of the near and dear ones. There are forces seen and unseen that guide our life. While I cannot comment on the unseen forces, I would like to take this opportunity to express my gratitude to all those people who knowingly and unknowingly helped me.

First and foremost, I would like to express my gratitude towards my PhD supervisor, Prof. B. N. Mallick, who initiated me into the field of neurophysiology. I am thankful to him not only for his academic guidance and counseling but also for giving me enough freedom and space to grow as an individual. I have learnt many things from him but the most cherished one are those, which are neither found in any textbook nor taught in any school. His constant endeavor to achieve greater heights and perfection has rubbed some of the magic onto me also. I also thank him for the subtle encouragement and the sharp and pointed criticism, both of which have helped me in developing a better insight and to be a better person. I am sure that the training that I got in this laboratory would always be my strength in the coming life.

I thank Prof. R.N.K. Bamezai, Dean, School of Life Sciences, JNU and all the previous Deans for the support and help extended during their tenure.

I can never repay the debt that I owe to my university. It was not only a temple of learning for me but also a place that shaped my personality. The secular and democratic ethos as well as the culture of tolerance, discussion and debate that embodies this university has inculcated a strong value system in me. I take immense pride in being the alumnus of JNU.

For the last more than five years, my laboratory has been my home. I cannot but smile at my fortune to have Sushil, Vikas, Parul and Sudipta as my senior colleagues. The younger lot of Dola, Ganesh, Harinder, Sirisha, Rakhi, Deependra and Pynskem has a place close to my
heart. A special note of thanks to Sushil who has always been there for me. Besides the help with the scientific material, his encouragement and affection has always been a big support. I can never thank him enough for all the things that he did for me. I also thank Bibhuti for his support and encouragement. Life would have rather been bland but for the effervescent presence of Vibha and Dheeraj, who have the penchant to smile even in the face of gravest adversary. I deeply cherish their friendship and thank them for being in my life.

I am extremely thankful to my colleagues, Amar and Vijayan, who extended all possible help during the time of my submission. Raksh deserves a special mention not only for making the ambience cheerful and enjoyable but also for helping me immensely in arranging the references for my thesis.

I could have never reached this day without the support of my family. Life would have been extremely difficult had it not been for my brother, Gaurav, who always made sure that I did not get bogged down by the trifle chores of family life. I am indebted to him for his unconditional love and help. I also thank my kid sister, Rashim, whose mere presence makes me forget my worries. I appreciate the help rendered by her and the ways in which she supported me in all these years. My fiancée, Anupama, has been the anchor that stabilized my life. She has been the most understanding and loving partner one can wish to get.

I also take this moment to thank staff of the animal house and CIF, in particular Mr R. N. Saini and Mr Balseet Singh for their cooperation. A word of appreciation and thanks is also due towards Mr Hari Shankar, Mr Ram kripal and Mr Anwar for excellent laboratory assistance.

The financial assistance in the form of the fellowship and contingent money provided by CSIR is duly acknowledged.
