Acknowledgement

Carrying out research work to completion and present in a lucid manner is a Herculean task. The same would not have been possible without the kind guidance and help of my respected supervisor (Dr. A.K. Tiwary) from time to time.

This thesis is a result of prayers, efforts, blessings of many and sacrificial love of my family and friends. I would like to thank them all and would like to specially acknowledge and extend my heartfelt gratitude to few of them who have made the completion of this research possible.

It's beyond the words to express my sincere respect, love and gratitude to my venerated supervisor, Dr. A.K. Tiwary for his intellect vision, research skills, inspiration and affection which constituted the soul of the present research work. His critical assessment, affectionate words and every available patience always kept me charged and motivated to perform best even in the situations of ups and downs. He is an institute in himself and I have to learn a lot from him. His encouragement, guidance and support from the initial to the final level enabled me to develop an understanding of the subject. I am truly grateful to him for extending his total co-operation and understanding when things were not too smooth. I am sincerely grateful for his advice that was not limited to my professional career. I truly believe that his influence has made me a better person. He designed to strike chords of deepest warmth and personal affection for me in making my research work an adventives revelation, which will always remain an ideal symbol of inspiration to me throughout my life.

Seniors and juniors are the most important ingredients in the recipe of life. I appreciate the unwavering and cheerful companionship of my seniors, Dr. Gurpreet Kaur, Dr. Vikas Rana, Lecturer (Senior scale) and my Juniors Mr. Kuldeep Singh & Mr. Sameer Bhandari who always stood by me in all my ups and downs and have always been a constant source of inspiration for me. I am indebted to Dr. Bharti Sapra and Mr. Manish Jindal, who helped me a lot throughout my work without whom my work would have been incomplete.

I whole heartedly thank Ms. Geena Malhotra (Head, Research & Development, Cipla Limited, Mumbai, India) for providing me the opportunity and all necessary facilities to accomplish this endeavor successfully.
Whatsoever little I achieved, my whole life is dedicated to my mother (Mrs. Sukeshi Panda) and father (Mr. Siva Prasad Panda), the emblems of love and care. They stood behind and watched me to go to be my own. I made my own mistakes and learned from them. The values, they installed in me is the strength of mine to challenge this world face to face. My profound affections and heartfelt gratitude for them is beyond the range of inscription of words. To make them happy and feel them proud when it comes to my name is the ultimate goal of my life.

Of course the best is always saved for last. Gratefulness for my parent’s (Mr. Siva Prasad Panda and Mrs. Sukeshi Panda) support and my wife’s (Mrs. Kadambini Panda) encouragement and understanding cannot be expressed in words. Her support, encouragement, and companionship have turned my journey into a pleasure. For all that and for being everything I am not, she has my everlasting love. Some people deserve special regards as they have contributed immensely by showering their unconditional love and affection. My earnest thanks to my loving son Rishabh, who shared light moments during my brief visits at home.

I find it difficult to pen down my deepest sense of indebtedness towards my elder brother, Mr. Pravat Ranjan Panda, sister-in-law, Mrs. Minati Panda, nephew Mr. Sthitapragya Panda and my younger brother Mr. Priya Ranjan Panda.

I also extend my thanks to non-teaching staffs of Punjabi University for their active cooperation.

Above all I thank God for blessing me with the strength to accomplish this work successfully. To him, I owe lifelong indebtedness.

(Rashmi Ranjan Panda)
