Acknowledgement

This thesis has been the culmination of the research work done in the Department of Chemistry, KLE University’s College of Pharmacy, Belgaum, Karnataka, INDIA, under the supervision of former Professor Dr. A.R. Bhat, presently Professor and Head Pharmaceutical Chemistry, St. James College of Pharmaceutical Sciences Chalakudy, Trissur, Kerala.

To begin with, I am grateful to Dr. F. V. Manvi and Dr. A. D. Taranalli for giving me the opportunity to carry out my dissertation work in KLE University’s College of Pharmacy, Belgaum. In particular, I am thankful to my supervisor Dr. A. R. Bhat for his support, patience and painstaking efforts to bring up this piece of work. He gave constant encouragement and support in various ways. His scientific acumen has made him a continuous source of ideas which inspired and enriched my growth as a student, researcher and the scientist I want to be. I am indebted to him, for his faith in me and providing the right direction whenever I needed it the most.

I am thankful to all the members of Department of Chemistry who helped me in one way or the other to carry out my work successfully. Especially, I thank Dr. K. R. Alagawadi, Dr. M. S. Palled and Mr. D. S. Mali for answering my endless questions and for being interesting peers.

I would like to thank all the people whose names I did not mention here, they provided me with the necessary help and made it possible for me to write this thesis.

Finally my family deserves special mention here. My deep and lasting gratitude to my mother Smt. Gangutai for her unconditional love, faith and support. My family has been a constant source of inspiration and this work is especially dedicated to them.

Meenaksi. M.
