I am indebted beyond words to acknowledge my heartfelt gratification at the completion of this momentous task to all who have helped me in this endeavor.

I can’t express my deep sense of gratitude and heartfelt regards in words for my esteemed supervisor, Dr. W. S. Lakra, Vice Chancellor/Director, Central Institute of Fisheries Education (ICAR), Mumbai, (Formerly Director, N.B.F.G.R., Lucknow) for his guidance, thoughtful criticism and sympathetic approach in solving various problems in the completion of this work. In spite of his busy schedule & lot of professional responsibilities he always supported and encouraged me both at professional and personal level like a guide, mentor & father. Not even at a single moment in last five years I felt any need to explain myself as he understand and tackle every situation smartly & confidently. In fact he is a great guide and administrator.

It gives me profound pleasure to express my indebtedness and respect to my internal supervisor, Dr. Jitender Sharma (Professor, Department of Biotechnology, Kurukshetra University, Kurukshetra) for his continuous support, guidance and constant encouragement. It would not have been a success without his keen interest and valuable supervision.

I am extremely obliged to Dr. J. K. Jena, Director, N. B. F. G. R., Lucknow, for providing all the facilities in this institution required during the present research work.

I would like to express my gratitude to Dr. Mukunda Goswami, Senior Scientist, N. B. F. G. R., Lucknow, who not only provided me proper guidance at every step of my work but also motivated me to do something new and challenging. Like an ideal teacher who does not create his own image in students, but develop students who can create their own image, he always gave me enough freedom to plan my work independently and gave me proper guidance at curial juncture of my work. His optimism and methodology of sorting out problems helped me many times during my research work and his thought provoking discussions, enriched me and left an ever lasting impression on my mind and soul.

Many thanks go in particular to Dr. Gaurav Rathore, (Senior Scientist), Dr. T. Rajaswaminathan (Senior Scientist), Dr. N. S. Nagpure (Head of Division & Principal Scientist), of N.B.F.G.R, Lucknow, for their generous help, utmost cooperation and suggestions throughout the course of practical work.

Without the help of my talented friends Akhilesh Singh, Bhagwati Sharan Sharma, Dhriendra Pratap Singh and Ajey Pandey this work would have been an uphill task. Their love, attitude, unreserved help and invaluable suggestions during the entire research work deserve special thanks. Collective and individual
I am also indebted to Shri Raj Bahudar Yadav (Technical staff), N. B. F. G. R., Lucknow for their excellent technical assistance. I have learned a lot from him; in fact he is a less educated but highly skilled person.

I am thankful to all staff of N.B.F.G.R, Lucknow and Department of Biotechnology, Kurukshetra University, Kurukshetra for their constructive help during the course of present study.

Last but not the least it is my utmost pleasure to thank my family and well wishers who always have given me the opportunities to strive for excellence. It is with their blessings, affection and encouragement that I have completed this enormous task, I owe apologies to them for my odd working hours and the difficulties they had to face in my prolonged absence from home.

In the very last I thank almighty God for giving me the strength and perseverance to complete this work.

(Kamalendra)
