Acknowledgments

This Ph.D. thesis is the outcome of collective efforts from all those contributed to it directly or indirectly. Therefore, I would like to acknowledge them all for their love and support. This multidisciplinary assignment was achieved under the joint supervision of Dr. Santosh K. Haram (Chemistry, UoP) and Dr. B. L. V. Prasad (NCL, Pune). This intricate task was highly impossible without the kind support and guidance from my research guides. I thus have to warmly thank Dr. Santosh K. Haram for accepting me as a Ph.D. student and introducing me to this interdisciplinary and ever challenging field of nanotechnology. I must specially thank Dr. B.L.V. Prasad, my research co-guide, for his timely guidance and support that led to accomplish the present thesis work. I must appreciate his contributions of time for rigorous monitoring of the thesis.

I would like to thank Prof. Madhurima Dikshit, the Head, Department of Chemistry, UoP and also Prof. R. S. Kusurkar, Prof. S. B. Padhye and Prof. B. S. M. Rao, the former Heads, Department of Chemistry for providing me all the infrastructure facilities necessary for my research work. I am indebted to several faculty members at our department for their assistance and cooperation during the course of my research tenure, especially Prof. K. R. Gawai, Dr. P. D. Lokhande, Dr. M. D. Nikalaje, Prof. S. P. Gejji, Dr. A. A. Athawale and Dr. A. S. Kumbhar. Furthermore, I express my sincere thanks to the non teaching staff, Department of Chemistry, UoP for their constant co-operation and assistance. I would like to thank Council of Scientific and Industrial Research (CSIR) for the junior and senior research fellowships and providing financial support.

I must express my gratitude to Dr. George Thomas and his students for their assistance in TCSPC (life time) measurements for few samples. I would also like to thank Dr. K. Vijaymohananan and his students specially Bhashkar and P. Meera for the help and useful discussion on several occasions. I must acknowledge to Ashwin (TIFR, Mumbai) for providing the assistance in TEM measurements. I would like to thank Dr. Anjali Kshirsagar (Physics, UoP) for providing the theoretical estimation of band structure parameters in case of few semiconductor Q-dots. Also, the generous help from Dr. Suresh Gosavi (Physics, UoP) for providing timely...
assistance in material characterization is deeply acknowledged. I must thank the people who provided me an opportunity to work at an International level by immediately accepting me as guest student at Technical University of Dresden, Germany. My special thanks to Dr. Nikolai Gaponik for introducing me to the group at TU Dresden. I thank Prof. Alexander Eychemuller, the Chair of the Institute of Physical Chemistry and Electrochemistry for providing me the necessary instrumental and infrastructure facilities. I must thank Dr. Stephen G. Hickey, who supervised me at TUD and introduced a lot of ideas specially related to the physics of materials. I should thank him for his kind help in fabricating the setup used for spectroelectrochemical measurements and also for introducing me to an interesting field of optoelectrochemistry. I would like to thank the authorities of German Academic Exchange Service (DAAD) for providing the fellowship and supporting my stay at Dresden for six months under the short term fellowship programme.

With great pleasure, I owe my special thanks to my friends at Dresden, especially Dr. Subhendu Panda and Mrs. Panda, Ganesh Shelke and Rajakumar Guduru for their help, kind support and pleasant atmosphere during my research stay at Dresden.

My special thanks to Christian Waurich and Susanne Kruger who helped me for the synthesis of CdSe Q-dots and its fabrication as a monolayer for spectroelectrochemical measurements. Also, I thank the other group members from TU Dresden, Stefanie, Thomas, Aliaksei, Shiding, Paul, Tobias and Vladimir for their friendly atmosphere that never made me to feel as a guest student.

I avail this opportunity to express my profound indebtedness and a very warm and special thanks to my beloved friend, Ms. Monika Bharadwaj with whom I spent most enjoyable time span of my Ph.D. life. I am highly indebted to express my heartfull sense of gratitude for her care, support and affectionate demeanor without which it would not have been possible to complete the thesis work. Therefore, I would like to thank her for all those things that she did for me.

I must acknowledge my senior colleagues Kanchan, Vijay, Mohsin and Shaukat for their help and friendly atmosphere, especially at the initial days of my journey to Ph.D. My special thanks to Mohsin and Vijay for the valuable discussion, helpful
suggestions and timely guidance. I am highly obliged to Mohsin for his training in electrochemistry experiments as well as strengthening the moral values in me. Also, I must express my special thanks to Shaukat and his wife Najneen Bhabhiji for homely refreshment on several occasions. Also, I must thank the other former members of the research group, Manisha and Tushar, Dr. Geeta Sharma, Aparna Kulkarni Madam, Mihir and Dr. Manoj Wankhede. I should also thank the present group members, Dr. Shailendra, Leila, Amol, Vrushali, Shivaji and Ganesh for providing cheerful atmosphere in the lab. The generous helping hands extended to me by the project students who worked with me viz. Rajiv, Sohan, Shital, Yogini and Omkar are deeply acknowledged.

I must thank Prof. Nanda Santosh Haram (MIT, Alandi, Pune) for her help and homely atmosphere. Also, I would like to acknowledge Dr. Pragati Thakur (UoP) and her research students for their help and support.

I would like to extend this vote of appreciation to my friends from Department of Chemistry, Rahul and Vibhavari, Maruti, Shashikant, Santosh, Prashant, Mahendra, Dikshaputra, Neeta, Mohini, Sarode Sir, Vitthal, Patil Sir, Jayashree, Anuja, Vivek, Aruna, Satish, Priyanka, Anuj, Kaustubh, Durba, Jovan and others. Also, I must extend this vote of thanks to some of my other friends, who extended their generous helping hands to me directly or indirectly during the tenure of my Ph.D. Therefore, I must thank Dr. Manoj, Milind, Rameshwar, Sandip, Sudhesh, Yogesh, Rajesh, Vishwas, Sudhir, Prerna, Balaji, Tongdi, Sangeeta, R. S. Kamble, S. M. Kale, Rupnar and others.

I must put on record, my sincere thanks to my friend Ganesh Sutar and his family members, Aai, Nana, Madhavi, Santosha and Rajani for their homely atmosphere during my stay at Pune and constant moral support.

I have no words to express my indebtedness to my beloved mother Smt. Chandabai Ingole, father Shri. Popinand Ingole and sisters Jayashree, Vaishali and Harshalata and in-laws for their love, affection and awe inspiring encouragement and unconditional support to pursue my interests, even when the interests went beyond boundaries of language, field, geography and economy. I ought to tribute this thesis to my eternal soul of my grandmother Smt. Shantabai Sonone.
and grandfather Shri. Prabhuji Sonone for their grace in reaching my destination. I also devote this thesis to the eternal memories of my grandmother late Smt. Chandrabhaga Ingole and grandfather late Shri. Narayanrao Ingole for their enormous blessings throughout my life career.

I stay honor-bound to my Mama Shri. Prakash Sonone and Mami Smt. Lata Sonone for their unceasing moral support, affection and succor all through my vocation and life. I owe my deep sense of gratitude to all my uncles, cousins and relatives for their moral support. At this occasion, I must appreciate the pleasant atmosphere at my home specially due to Baccha party (kids), Prashika, Samyak, Tathakshu, Pratish, Sakshi, Gontu and Sanika.

Lastly, I offer my regards and blessings to all of those who supported me in any respect during the completion of the thesis.

Mr. Pravin Popinand Ingole

Department of Chemistry,

University of Pune, Pune-07.

September 2010.
